Quanta PUBLISHER

BS / M.Sc Physics Books

EMINENT AUTHORS

Sr. #	Author's Name	University / College
1.	Prof. Dr. Rana Anwar Manzoor	Bahauddin Zakariya University, Multan
2.	Asim Javed Siddique	Bahauddin Zakariya University, Multan
3.	Dr. Abdul Shakoor	Bahauddin Zakariya University, Multan
4.	Dr. Muhammad Nauman Usmani	Bahauddin Zakariya University, Multan
5.	Dr. Muhammad Rana Arif Khalil	Bahauddin Zakariya University, Multan
6.	Dr. Muhammad Amjad Farooq	Govt. Graduate College, Muzaffargarh
7.	Dr. Muhammad Ehsan Mazhar	Bahauddin Zakariya University, Multan
8.	Dr. Malika Rani	Women University, Multan
9.	Dr. Muhammad Tufiq Jamil	Govt. Graduate College, Muzaffargarh
10.	Dr. Syed Hamad Bukhari	Govt. College University Faisalabad, Sub-Campus, Layyah
11.	Dr. Ejaz Khaira	Islamia University of Bahawalpur, Bahawalnagar Campus
12.	Dr. Ammara Riaz	Bahauddin Zakariya University, Multan
13.	Dr. Qaiser Maqsood	Govt. College University Faisalabad, Sub-Campus, Layyah
14.	Jamshaid Alam Khan	Govt. Graduate College, Khanewal
15.	Hafiz Umer Farooq	Govt. Graduate College of Science, Multan
16.	Hammad Abbas	Emerson University, Multan
17.	Zohaib Akram Khan	Govt. Graduate College, Khanawal
18.	Muhammad Rashid	Govt. Graduate College, Burewala
19.	Muhammad Salman	Govt. Graduate College, Burewala
20.	Shafiq Ahmad	Govt. Degree College, Thana Malakand, KPK
21.	Ahsan Javeed	Govt. Associate College Kalyan
22.	Saima Kazmi	Govt. College University Faisalabad, Sub-Campus, Layyah
23.	Mahwish Mukhtar	Govt. College University Faisalabad, Sub-Campus, Layyah
24.	Ameed-ul-Hassan Alvi	Govt. College University Faisalabad, Sub-Campus, Layyah
25.	Amna Ejaz	Govt. College University Faisalabad, Sub-Campus, Layyah
26.	Fehmeeda Shaheen	PhD Scholar, University of Taiwan, Taiwan
27.	Asif Nawaz	PhD Scholar, University of Cincinnati, USA
28.	Qudsia Shamas	Govt. College University Faisalabad, Sub-Campus, Layyah
29.	M. Nadeem Ishaq	University of Education, Sub-Campus, Multan

LIST OF BOOKS

Sr. #	Book Name	Edition	Price
1.	Mechanics-I	3rd	400
2.	Waves & Oscillations	2nd	250
3.	Heat & Thermodynamics	3rd	250
4.	Electricity & Magnetism	2nd	300
5.	Modern Physics and Electronics	3rd	300
6.	Atomic & Molecular Physics	1st	300
7.	Quantum Mechanics-I	5th	260
8.	Quantum Mechanics-II	4th	260
9.	Nuclear Physics	4th	450
10.	Thermal and Statistical Physics	3rd	350
11.	Classical Mechanics	6th	350
12.	Computational Physics	1st	400
13.	Methods of Mathematical Physics-I	2nd	300
14.	Methods of Mathematical Physics-II	1st	280
15.	Solid State Physics-I	2nd	300
16.	Solid State Physics-II	1st	300
17.	Electromagnetic Theory-I	2nd	300
18.	Electromagnetic Theory-II	1st	350
19.	Digital Electronics	2nd	400
20.	Optics	1st	330
21.	LASER	1st	340
22.	Plasma Physics	2nd	250
23.	Applied Physics	1st	250
24.	Science of Global Challenges	1st	240
25.	Laboratory Manual-I: Mechanics	2nd	200
26.	Laboratory Manual-II: Waves and Oscillations	1st	300
27.	Laboratory Manual-III: Electricity & Magnetism	2nd	200
28.	Laboratory Manual-IV: Modern Physics	2nd	200
29.	Laboratory Manual-V: Spectroscopy and Modern Physics	1st	250
30.	Laboratory Manual-VI: Analog Electronics	1st	250

UPDATED ON: January, 2024

1 Vector Analysis 01
1.1 Introduction to Mechanics 01
1.1.1 Units and Dimensions 02
1.1.2 System International Units (SI units) 03
1.1.3 Scientific Notation 03
1.1.4 Changing Units 03
1.2 Scalar and Vector 04
1.3 Vector and Scalar Triple Products 12
1.4 Spherical & Cylindrical Polar Coordinate 15
1.5 Circular Motion 16
1.6 Line Integral, Volume Integral and Surface 17
1.7 ∇ Operator 19
1.8 Gauss's Divergence Theorem 25
1.9 Stoke's Theorem or Curl Theorem 27
1.10 Vector Identities 28
1.11 Review Questions and Problems 31
2 Particle Dynamics 32
2.1 Review of Motion 32
2.2 Types of Forces 33
2.3 Frictional Forces 34
2.4 The Dynamics of Uniform Circular Motion 36
2.5 The Conical Pendulum 37
2.6 The Rotor 40
2.7 The Banked Curve 41
2.8 Equations of Motion Under Constant Force 42
2.9 Time Dependent Forces (Analytical 45
2.10 Effect of Drag Forces on Motion or 46
2.11 Projectile Motion 49
2.12 Non-Inertial Frames and Pseudo Forces 54
2.13 Review Questions and Problems 56
3 Work, Power and Energy 57
3.1 Introduction 57
3.2 Work Done by the Constant Force 57
3.3 Work Done by a Variable a Force 59
3.4 Work-Energy Theorem 65
3.5 Power 67
3.6 Conservation of Energy 68
3.7 The Force of Gravity 71
3.8 Potential Energy 71
3.9 The Gravitational Force 75
3.10 Conservation of Energy in System of 77
3.11 Review Questions and Problems 78
4 Systems of Particles 79
4.1 Introduction 79
4.2 Particle Systems 79
4.3 Center of Mass of Solid Objects 83
4.4 Momentum Changes in a 87
4.5 Application to Motion of Rocket 89
4.6 Review Questions and Problems 91
5 Collisions 93
5.1 Impulse and Momentum 93
5.2 Introduction to Collision 94
5.3 Elastic Collision in One Dimension 96
5.4 Two Dimensional Elastic Collision 100
5.5 Two Dimensional Elastic Collision 102
5.6 Inelastic Collision 104
5.7 Two Dimensional Inelastic Collision 105
5.8 Collisions in Center of Mass Reference 106
5.9 Review Questions and Problems 109
6 Gravitation 111
6.1 Introduction 111
6.2 Universal Gravitation Law 111
6.2.1 Henry Cavendish Experiment 113
6.3 Gravitational Effect of a Spherical 114
6.4 Gravitational Potential Energy 117
6.5 Calculation of Escape Velocity 120
6.6 Gravitational Field & Gravitational 122
6.7 Radial and Transversal Components 123
6.8 The Motion of Planets and Kepler's Laws 125
6.9 Motion of Satellites 128
6.10 Energy Consideration in Planetary 129
6.11 Universal Law to the Galaxy 130
6.12 Review Questions and Problems 132
7 Rotational Dynamics 133
7.1 Relationship Between Linear and 133
7.2 Kinetic Energy of a Rigid Body 136
7.3 Parallel Axis Theorem 137
7.4 Perpendicular Axis Theorem 139
7.5 Illustrations of Parallel Axes and 140
7.6 Rotational Dynamics of Rigid Bodies 144
7.7 Combined Rotational and Translational 146
7.8 Rolling without Slipping 148
7.9 Review Questions and Problems 150
8 Angular Momentum 151
8.1 Introduction 151
8.2 Relation between Torque and Angular 153

8.3 Law of Conservation of Angular 155
8.4 Stability of Spinning Objects 156
8.5 The Spinning Top or Precessional 157
8.6 Review Questions and Problems 160
9 Bulk Properties of Matters 161
9.1 Introduction 161
9.2 Elastic Properties of Matter 162
9.3 Tension, Compression and Shearing 164
9.4 Elastic Modulus 165
9.5 Poisson's Ratio 166
9.6 Relation between Y, K and η 166
9.7 Fluid Statics 169
9.8 Surface Tension 173
9.9 Role of Surface Tension in Formation of 174
9.10 Viscosity 175
9.11 Fluid Flow through a Cylindrical Pipe 177
9.12 Review Questions and Problems 180
10 Special Theory of Relativity 181
10.1 Introduction 181
10.2 Postulates of Special Theory of Relativity 183
10.3 The Lorentz Transformation 184
10.4 Consequence of Lorentz Transformation 188
10.5 Doppler Effect 191
10.6 Twin Paradox 192
10.7 Transformation of Velocity 193
10.8 Variation of Mass with Velocity 194
10.9 Mass Energy Relation or Relativistic 196
10.10 Relativistic Momentum 198
10.11 Lorentz Invariant Relativistic Energy 200
10.12 Review Questions and Problems 201

1 Harmonic Motion 01
1.1 The Simple Harmonic Motion (SHM)..... 01
1.1.1 Various Parameters of SHM..... 04
1.2 Energy Consideration in SHM..... 06
1.3 Applications of SHM..... 09
1.3.1 The Torsional Oscillator (Pendulum)... 09
1.3.2 Simple Pendulum 11
1.3.3 The Physical Pendulum 13
1.4 SHM and Uniform Circular motion..... 15
1.5 Damped Harmonic Motion 17
1.5.1 Parameters of Damped Harmonic..... 19
1.6 Forced Harmonic Motion..... 20
1.7 Lissajous Figures 20
1.8 Review Questions Solved Problems 26

2 Wave in Physical Media 29
2.1 Waves 29
2.2 Sinusoidal Waves 33
2.3 Wave Speed 35
2.4 The Wave Equation 37
2.5 Power and Intensity in Wave Motion 40
2.6 The Principle of Superposition 42
2.7 Interference of Waves..... 43
2.7.1 Types of Interference 44
2.8 Standing Waves..... 45
2.9 Phase Change on Reflection 47
2.10 Review Questions Solved Problems 48

3 Beats and Polarization..... 50
3.1 Beats 50
3.1.1 Analytical Treatment 50
3.2 The Doppler Effect 52
3.3 Polarization 55
3.4 Double Refraction and Polarized 61
3.5 Review Questions Solved Problems 64

4 Coupled Oscillators and Normal Modes 66
4.1 Two Coupled Oscillators..... 66
4.2 The General Method for Normal Mode 73
4.3 Mass or Inductance Coupling 75
4.4 Coupled Oscillations of a Loaded String ... 78
4.5 Inductance Coupling of Two 82
4.6 Kundt's Tube 90
4.7 Coupled Masses 91
4.8 Oscillations and Resonance 93
4.9 Vibrations of Air Columns..... 95
4.10 Review Questions Solved Problems 99

5 Interference and Diffraction 100
5.1 Interference 100
5.2 Young's Double Slit Experiment 101
5.3 Adding of Electromagnetic Waves 104
5.4 Interference in Thin Films 106
5.5 Newton Rings 108
5.6 Diffraction and the Wave Theory of Light 110
5.7 Diffraction by a Single Slit 111
5.8 Diffraction at a Circular Aperture 117
5.9 Review Questions Solved Problems 119

6 Multidimensional Waves and Wave Pulses 121
6.1 Sound Waves (Newton's Model)..... 121
6.2 Transmission Lines And Reflection and Transition With Boundary Conditions 124
6.2.1 Reflection and Transmission..... 125
6.3 Laws of Geometrical Optics 127
6.4 Fourier Series And Fourier Transform..... 128
6.5 Plane Waves..... 129
6.6 Three Dimensional Differential Wave Equation..... 132
6.7 Cylindrical Waves..... 133
6.8 Electromagnetic Waves..... 134

1 Basic Concepts of Thermodynamics 01
1.1 Types of System 02
1.2 Macroscopic and Microscopic 02
1.3 Extensive and Intensive Variables 03
1.4 Thermodynamic Equilibrium 04
1.5 Processes and Cycles 05
1.6 Review Questions 06
2 Heat and Temperature 07
2.1 Heat 08
2.2 The Transfer of Heat 10
2.3 Heat Capacities of an Ideal Gas 12
2.4 Heat Capacities of Solids 14
2.5 Kinetic Theory and Ideal Gas 15
2.6 Equation of State (Ideal Gas Law) 16
2.7 Kinetic Theory of Gases 17
2.8 Work Done on an Ideal Gas 21
2.8.1 Work Done at Thermal Isolation 24
2.8.2 Pressure Force is Non-conservative 26
2.9 The Internal Energy of an Ideal Gas 28
2.10 Equipartition of Energy 29
2.11 Intermolecular Forces 30
2.12 The van der Waals Equation of State 31
2.13 Vidal Expansion 34
2.14 Review Questions and Problems 35
3 Laws and Functions of Thermodynamics 36
3.1 Zeroth Law of Thermodynamics 36
3.2 First Law of Thermodynamics 37
3.3 Applications of First Law of 38
3.4 Proof of PV_1 = Constant for an Adiabatic Process 40
3.5 2nd law of Thermodynamics 42
3.6 The 3rd Law of Thermodynamics 43
3.7 Thermodynamic Functions 44
3.8 Maxwell's Thermodynamic Relations 47
3.9 Applications of Maxwell Equations 46
3.10 Energy Equation 51
3.11 Applications Of TDS Equations 52
3.12 Clausius Clapeyron Equation 56
3.13 Joule Thomson Effect or Porous 57
3.14 Liquefaction of Gases 60
3.15 Review Questions and Problems 60
4 Entropy and 2"d Law of Thermodynamics 64
4.1 Introduction 64
4.2 Entropy 64
4.2.1 Law of Increase of Entropy 66
4.2.2 Entropy Changes in an Ideal Gas 67
4.2.3 Temperature Entropy Diagram 68
4.2.4 Entropy and the 2nd Law of Thermodynamics 69
4.2.5 Entropy in Reversible Process 70
4.2.6 Entropy in Irreversible Process 71
4.2.7 Irreversible Heat Transfer 72
4.2.8 Entropy and Probability 73
4.3 Heat Engine and 2nd Law of Thermo- 74
4.4 Refrigerator and 2nd law of Thermo- 76
4.5 Carnot Engine 78
4.6 Efficiency of Carnot Engine 81
4.6.1 Carnot's Theorem 82
4.6.2 Prove that efficiency of real heat 82
4.7 Thermodynamic Temperature Scale 88
4.8 Absolute Zero of Temperature and 3rd 89
4.9 Review Questions and Problems 90
5 Thermoelectricity 90
5.1 Thermoelectricity 90
5.2 Seebeck Effect 91
5.3 Peltier Effect 92
5.4 Thomson Effect 93
5.5 Review Questions and Problems 94
6 Statistical Mechanics 96
6.1 Statistical Mechanics 96
6.2 Basic Postulates of Statistical Mechanics 96
6.3 Probability 96
6.4 Statistical Distribution and Mean Values 98
6.5 Brownian Motion OR Random Walk 99
6.6 Mean Free Path 102
6.7 The Distribution of Molecular Speed 105
6.8 Maxwell-Boltzmann Energy Distribution 109
6.9 Viscosity of Gases 111
6.10 Diffusion of Gases 113
6.11 Thermal Conductivity of Gases 114
6.12 Review Questions and Problems 116

1 Electric Field 02
1.1 Electric Charge 02
1.2 Applications of Electrical Force 04
1.3 Coulomb's Law 05
1.4 Electric Field Intensity (E) 08
1.4.1 Electric Field Intensity Due to Point 08
1.4.2 Electric Field Due to Continuous 09
1.5 The Electric Dipole 11
1.6 Electric Field for Continuous Charge..... 12
1.7 Electric Field Due to Ring of Charge 14
1.8 Electric Field Due to Charged Disk 15
1.9 Torque on a Dipole in an Electric Field 17
1.10 Potential Energy of an Electric Dipole 18
1.11 Electric Flux 19
1.12 Gauss's Law 20
1.13 Deduction of Coulomb's Law from 22
1.14 Applications of Gauss's Law 22
1.14.1 Electric Field Due to Infinite Line 22
1.14.2 Electric Field Due to Infinite 24
1.14.3 Electric Field due to Spherical 26
1.15 Gauss's Law (Spherical Symmetry) 28
1.16 Charged Isolated Conductor 30
1.17 Review Questions and Problems 32
2 Electric Potential 37
2.1 Electric Potential Energy Difference 37
2.2 Absolute Electric Potential Energy 38
2.3 Electric Potential Due to Point Charge 38
2.4 Potential Due to Electric Dipole 40
2.5 Potential Due to Continuous Charge 41
2.6 Potential Due to Charged Disk 42
2.7 Calculating Field from the Potential 43
2.8 Poisson's and Laplace's Equations 44
2.9 Potential and Field Inside and Outside of 44
2.10 Conductor in External Electric Field 46
2.11 Surface Charge Density for an 47
2.12 Review Questions and Problems 48
3 Capacitance 51
3.1 Capacitor 51
3.2 Capacitance 52
3.3 Capacitance of a Parallel-Plate Capacitor 53
3.4 Capacitance of Spherical Capacitor 54
3.5 Capacitance of a Cylindrical Capacitor 56
3.6 Capacitor with Dielectric 58
3.7 Energy Stored in Electric Field 61
3.8 Gauss's Law in Dielectrics 62
3.9 Review Questions and Problems 68
4 DC Circuits 71
4.1 Electric Current 71
4.2 Drift Velocity 72
4.3 Electrical Resistance 74
4.4 Ohm's Law 76
4.5 Energy Transfer in Electric Circuit 78
4.6 Equation of Continuity 79
4.7 Kirchhoff's Rules 81
4.8 Calculating Current in a Single Loop Circuit... 82
4.9 Superposition, Thevenin and Norton 83
4.10 Growth of Current in RC Series Circuit 89
4.11 Decay of Current in RC Series Circuit 91
4.12 Review Questions and Problems 93
5 Magnetic Field 97
5.1 Magnetic Field 97
5.2 Force on a Current Carrying Conductor 98
5.3 Force On Moving Charged Particle In 100
5.4 Motion of Charged Particle in an 102
5.5 Torque on a Current Loop 103
5.6 The Magnetic Dipole Moment 104
5.7 Determination of the Electron e/m Ratio ... 106
5.8 Biot-Savart Law 107
5.9 Application of Biot-Savart Law 109
5.10 Ampere's Law 111
5.11 Application of Ampere's Law 113
5.12 Gauss's Law for Magnetism 115
5.13 Atomic Magnetism 116
5.14 Nuclear Magnetism 118
5.15 Magnetization 119
5.16 Magnetic Materials 120
5.17 Hysteresis Loop 123
5.18 Review Questions and Problems 125
6 Induction and Inductance 129
6.1 Magnetic Flux 129
6.2 Faraday's Law of Electromagnetic 129
6.3 Lenz law 131
6.4 Lenz Law and Conservation of Energy 132
6.5 Motional Induction and Motional emf 132
6.6 Induced Electric Field 134
6.7 Eddy Current 135
6.8 Inductance 135
6.8.1 Inductance of a Solenoid 136
7 Alternating Current Circuits 156
7.1 AC Voltage Across Resistor 156
7.1.1 Phaser Method..... 156
7.2 Alternating Voltage Across an Inductor 157

7.3 Alternating Voltage Across a Capacitor 158
7.4 Single Loop RLC Series Circuit (Analytical treatment) 160
7.5 R.L.0 Series Circuit (Graphical Analysis) 162
7.6 Power in Alternating Circuit 164
7.7 Power Dissipated in RLC Series Alternating Circuit 165
7.7.1 Power Factor 166
7.8 Review Questions and Problems..... 167
8 Maxwell's Equations and Electromagnetic..... 169
8.1 Summarizing the Electromagnetic..... 169
8.2 Induced Magnetic Fields And The 170
8.3 Maxwell's Equations 172
8.4 Generating An Electromagnetic Wave 172
8.5 Traveling Waves and Speed of Light from..... 174
8.6 Energy Transport And The Poynting Vector.. 178
8.7 Review Questions and Problems..... 179

1 Origins of Quantum Mechanics 01
1.1 Introduction 01
1.2 Black Body Radiation 05
1.3 Emissive Power 09
1.4 Photoelectric Effect 11
1.5 Compton Effect 15
1.6 Correspondence Principle 19
1.7 Review Questions and Problems 20
2 Wave Particle Duality 24
2.1 Wave Behavior of Particles 24
2.2 Testing de Broglie's hypothesis 25
2.3 The Davison-Germer Experiment 26
2.4 G.P Thomson Experiment 27
2.5 Dual Nature of Matter 28
2.6 The Uncertainty Principle 29
2.7 Double-Slit Experiment: The only mystery 30
2.8 Wave and Wave Packets 34
2.9 Review Questions and Problems 35
3 Introduction to Quantum Mechanics 38
3.1 Wavefunction: Another Marvel 38
3.2 The Schrodinger Wave Equation 39
3.3 A Particle Trapped in a Box 40
3.4 Bohr's Atomic Model 44
3.5 Bohr's Orbits are not Really 45
3.5.1 The True Shape of Atom 47
3.5 Quantum Numbers 48
3.6 Stern-Gerlach Experiment 51
3.7 Review Questions and Problems 54
4 Atomic Physics 56
4.1 Introduction 56
4.2 Line Spectrum 59
4.3 Bohr Atomic Model (Review) 61
4.4 Frank-Hertz Experiment 65
4.5 Pauli Exclusion Principle 66
4.6 X-rays Spectra 67
4.7 LASER 71
4.7.1 Spontaneous Emission 71
4.7.2 Stimulated Emission 73
4.7.3 Absorption 74
4.9 Review Questions and Problems 76
5 Nuclear Physics 79
5.1 Models 79
5.2 Basic Properties of a Nucleus 81
5.3 Nuclear Physics 83
5.4 Some Basic Definitions 84
5.5 Properties of Nucleus 87
5.6 Measuring the Ionizing Radiation 88
5.7 Natural Radioactivity 90
5.8 Half-Life 91
5.9 Radioactive Decay 92
5.10 Nuclear Reactions 94
5.11 Nuclear Fission 95
5.12 Nuclear Reactor 97
5.13 Nuclear Fusion 98
5.14 Controlled Thermonuclear Fusion 99
5.15 Review Questions and Problems 100
6 Basic Electronics 103
6.1 Basic Crystal Structure 103
6.1 Free Electron Model 108
6.2.1 Three Dimensional Case 111
6.2.2 Density of States in One Dimension 112
6.2.3 Density of States in Three Dimension 112
6.1 Band Theory in Solids 114
6.3 N-Type and P-Type Semi-Conductors 116
6.4 P-N Junction Diode 118
6.5 Rectification 123
6.5.1 Half-Wave Rectification 124
6.5.2 Full Wave Rectification 125
6.6 Transistor 127
6.7 Amplifier 135
6.8 Load Line 138
6.9 Operating Point OR Q-Point Of a 140
6.10 Feed-Back 142
6.11 Oscillators 143
6.12 Transistor Phase-Shift Oscillator 143
6.13 Multivibrator 145
6.16 Logic Gates 147
6.16 Review Questions and Problems 153

3.7 LS Coupling 75
3.8 JJ Coupling 77
3.9 Hyperfine Structure 78
3.10 Helium 79
3.11 Ground State of Helium 81
3.12 Excited State of Helium 81
3.13 Transition in Helium 83
3.14 (Review Q.) (Solved Problems) (MCQ's).... 85

4 Interaction with Field 93
4.1 Many Electron Atoms in an 93
4.2 Zeeman Effect 93
4.2.1 Normal Zeeman Effect 94
4.2.2 Anomalous Zeeman Effect 97
4.3 Stark Effect 100
4.4 Paschen Back Effect 102
4.5 (Review Q.) (Solved Problems) (MCQ's)..... 105

5 Molecules 114
5.1 Chemical Bond and Molecular Formation..114
5.2 Electron Sharing 117
5.3 H2 Molecule 118
5.4 Ionic and Covalent Bonding 120
5.5 Diatomic Molecules Rotational Spectra 122
5.6 Vibrational and Electronic Spectra of 125
5.9 Polyatomic Molecules 130
5.10 Electron Spin and Hund's Rule 132
5.11 Raman Effect 135
5.12 (Review Q.) (Solved Problems) (MCQ's)...144

6 LASER 152
6.1 Black Body Radiation 152
6.2 (Stimulated) Absorption of Radiation 158
6.3 Spontaneous Emission 158
6.4 Stimulated Emission of Radiation 160
6.5 Einstein Co-efficient 161
6.6 Characteristics of LASER 163
6.7 Pumping Schemes 165
6.8 Different Types of LASER 167
6.8.1 The Ruby Laser (A 3-Level System)... 169
6.8.2 Helium-Neon Laser (A 4- Level 172
6.8.3 Nd:YAG Laser (A 4- Level System) 177
6.8.4 CO_2 Laser (A 4- Level System) 180
6.9 LASER Applications 184

1 Origins of Quantum Mechanics 01
1.1 Introduction 01
1.2 Particle Verses Waves 05
1.2.1 Blackbody Radiation 05
1.2.2 The Photoelectric Effect 07
1.2.3 The Compton Effect 08
1.2.4 Pair Production & Annihilation 09
1.2.5 Matter Waves 09
1.3 Bohr Model: Old Quantum Theory 10
1.4 Double-Slit Experiment: The only mystery.. 12
1.5 Heisenberg Uncertainty Principle 14
1.6 Metter Waves and Waves Packet 15
1.7 Wavefunction: Another Marvel 16
1.8 Bohr's Orbits: The Real Becomes Virtual 18
1.9 The True Shape of Atom: Cloudy 19
2.0 Review Questions and Problems 20

2 Mathematical Tools of Quantum Mechanics .. 22
2.1 Complex Numbers 22
2.2 Equation of Traveling Plane Wave 23
2.3 Linear Vector Space 23
2.4 Hilbert Space H 24
2.5 Dimension and Basis of a Vector Space 25
2.6 Dirac Notation 25
2.7 Observable 26
2.8 Operators 27
2.9 Representation of Kets and Bras in..... Discrete Bases..... 29
2.10 Representation of Kets and Bras in..... Continuos Bases..... 31
2.11 Eigenfunction and Eigenvalues 32
2.12 The Schrodinger Wave Equation 32
2.13 Commutation Relation 33
2.14 Review Questions and Problems 34

3 Fundamentals of Quantum Mechanics 35
3.1 Postulates of Quantum Mechanics 35
3.2 How Measurement Disturb the System 36
3.3 Uncertainty Relation Between Two 37
3.4 The Conservation of Probability 38
3.5 The Superposition Principle 39
3.6 The Schrodinger Cat 39
3.7 Schrodinger Equation and Stationary State. 40
3.8 The Pictures of Quantum Mechanics 42
3.9 Unitary Transformation 43
3.10 The Ehrenfest Theorem 46
3.11 Connecting Quantum and Classical 47
3.12 Review Questions and Problems 48

4 One-Dimensional Problems 49
4.1 Properties of One-Dimensional Motion 49
4.2 The Free Particle: Continuous State 51
4.3 The Potential Step 53
4.3.1 Case $E > V_o$ 53
4.3.2 Case-II ($E < V_o$) 56
4.4 The Potential Barrier 59
4.4.1 Case-I ($E > V_o$) 59
4.4.2 Case-II $E < V_o$: Tunneling 65
4.5 The Infinite Square Well Potential or 69
4.6 The Finite Square Well Potential 72
4.7 Harmonic Oscillator 77
4.8 Review Questions and Problems 80

5 Angular Momentum 82
5.1 Orbital Angular Momentum in Cartesian 83
5.2 Orbital Angular Momentum in Spherical 83
5.3 Commutation Relations 84
5.4 General Formalism of Angular 86
5.5 Eigenstates and Eigenvalues of $\hat{J}_z$ 87
5.6 Raising and Lowering Operators 88
5.7 Eigenavalue for Total Angular Momentum $\hat{J}^2$ ... 90
5.8 Matrix Representation of Angular 92
5.9 Geometrical Representation of Angular 94
5.10 Spin Angular Momentum 94
5.11 Review Questions and Problems 97

6 Three-Dimensional Problems 98
6.1 3D Problems in Cartesian Coordinates 98
6.2 The Free Particle in 3D 99
6.3 The Box Potential 100
6.4 The Harmonic Oscillator 102
6.5 Central Potential Spherical 102
6.6 The Hydrogen Atom 105
6.7 Spherical Harmonics 110
6.8 Quantum Numbers 112

1 Identical Particles 02
1.1 Schrodinger Wave Equation 02
1.2 Symmetric and Antisymmetric Functions ... 03
1.3 Classes of Identical Particles 04
1.4 Systems of Identical Particles 06
1.5 Exchange Operator (Pij) or 07
1.6 Exchange Degeneracy 07
1.7 A System of Identical Non-interacting 08
1.8 Pauli Exclusion Principle 10
1.9 Second Quantization 13
1.10 Matrix Representation of Kets, Bras 15
1.11 Review Questions Solved Problems 17

2 Approximation Methods 20
2.1 Perturbation Theory 21
2.2 Time Independent Non-degenerate 23
2.3 Time Independent Degenerate 27
2.4 Variational Principle or Rayleigh Ritz 31
2.5 Wentzel Kramers Brillouin (WKB) Method.. 33
2.6 Review Questions Solved Problems 39

3 Time Dependent Perturbation Theory 41
3.1 Time Evolution of a System 41
3.2 Time Dependent Perturbation Theory 42
3.3 Transition Probability 46
3.3.1 For a Constant Perturbation 47
3.3.2 For a Harmonic Perturbation 50
3.4 Interaction of Atoms with Radiation 55
3.5 Selection Rules For Electric Dipole: 60
3.6 Spin of Photon and its Helicity 61
3.7 Review Questions Solved Problems 61

4 Scattering Theory 63
4.1 Classical Scattering Theory 63
4.2 Quantum Scattering Theory 66
4.3 Partial Waves Analysis 70
4.4 The Born Approximation 73
4.5 Frame of References 75
4.6 Review Questions Solved Problems 76

5 Relativistic Quantum Mechanics 78
5.1 Non-relativistic and Relativistic Quantum.... 78
5.2 Klein-Gordon Equation 80
5.3 Free Particle Solution of K-G Equation 81
5.4 Equation of Continuity 83
5.5 Limitations of Klein-Gordon Equation 85
5.6 Dirac Equation 86
5.7 Hole Theory 89
5.8 Review Questions Solved Problems 90

6 Application to Quantum Mechanics 113
6.1 Fine Structure of Hydrogen Atom 113
6.1.1 Spin Orbit Coupling 114
6.1.2 Relativistic Correction 118
6.2 The Zeeman Effect 123
6.2.1 Weak Field Zeeman Effect 125
6.2.2 Strong Field Zeeman Effect 130
6.2.3 Intermediate Field Zeeman 130
6.3 Review Questions Solved Problems 132

1 Basic Properties of Nucleus 01
1.1 Models 01
1.2 Basic Properties of a Nucleus 04
1.3 Nuclear Physics 05
1.4 Terms Associated With Nucleus 06
1.5 Quantitative Facts About Nucleus 09
1.6 Mass Spectrometry 10
1.7 Binding Energy per Nucleon 14
1.8 Angular Momentum of a Nucleus 15
1.9 Nuclear Parity 20
1.10 Nuclear Statistics 21
1.11 Proton-Electron Hypothesis 22
1.12 Proton-Neutron Theory 24
1.13 Review Questions and Problems 26
2 Nature of Nuclear Forces 30
2.1 Types Of Interactions 30
2.1.1 Gravitational Interactions 31
2.1.2 Electromagnetic Interactions 31
2.1.3 Strong interactions. 32
2.1.4 Weak Interactions 32
2.2 Properties of Nuclear Forces 33
2.3 The Deuteron 37
2.3.1 Square Well Solution of The 38
2.4 Meson Field Theory of Nuclear Force 41
2.5 The Yukawa Interaction Potential 43
2.6 Nucleon-Nucleon Scattering 45
2.7 Neutron-Proton Scattering.. 46
2.8 Proton-Proton Scattering 48
2.9 Isospin 50
2.10 Review Questions and Problems. 52
3 Nuclear Models 55
3.1 Introduction 55
3.2 The Fermi-Gas Model 56
3.3 Liquid Drop Model 58
3.4 Bethe-Weizsacker 59
3.5 Nuclear Shell Model 63
3.6 Spin-Orbit Coupling 70
3.7 Prediction Of The Shell Model 72
3.8 Collective Model 74
3.9 Superdeformed Nuclei 77
3.10 Review Questions and Problems 77
4 Theories of Radioactive Decay. 80
4.1 Introduction 80
4.2 General Properties of Radioactive 81
4.3 Laws Of Disintegration 84
4.3.1 Activity And Its Units 85
4.3.2 Half-Life 85
4.3.3 Average (Mean) Life 86
4.4 Radioactive Series 87
4.5 Alpha Disintegration Energy 89
4.6 Theory of Alpha Decay. 90
4.7 Beta Decay 91
4.7.1 Lepton Number 95
4.7.2 Neutrino Mass 96
4.7.3 The Magnetic Lens Spectrometer 97
4.7.4 Cowan And Reines Experiment 98
4.8 Gamma Decay 100
4.8.1 Gamma Decay 100
4.8.2 Internal Conversion 101
4.8.3 Internal Pair Conversion 103
4.8.4 Multi-Polarity Of Gamma Rays 104
4.9 Nuclear Isomerism 106
4.10 Fermi Theory Of 3-Decay 107
4.10.1 Fermi Golden Rule 108
4.11 Angular Momentum and Parity Selection Rules in Alpha Decay 111
4.12 Parity Violation in Beta Decay 112
4.13 Angular Momentum and Parity Selection Rules in Beta Decay 114
4.14 Angular Momentum and Parity Selection Rules in Gamma Decay 116
4.14 Review Questions and Problems 117
5 Theories of Radioactive Decay 121
5.1 Introduction 121
5.2 Types Of Nuclear Reactions 122
5.3 Conservation Laws 124
5.4 Energy Considerations 127
5.4.1 Nucleon-Nucleon Scattering 129
5.4.2 Neutron-Proton Scattering.. 129
5.5 Nuclear Transmutations 130
5.6 Energy Levels (Excited State of Nucleus) 133
5.7 Level Width 135
5.8 Nuclear Cross-Section 136
5.9 Bohr's Compound Nucleus 138
5.10 Direct Reactions 139

5.11 Breit-Weigner One Level Formula..... 139
5.12 Coulomb Scattering..... 141
5.12.1 Elastic Coulomb Scattering..... 141
5.12.1 Inelastic Scattering..... 143
5.13 Review Questions and Problems..... 144
6 Elementary Particles..... 147
6.1 Fundamental Interactions in Nature..... 147
6.2 Conservation Laws of EP..... 149
6.3 Neutrino and Anti-Neutrino..... 151
6.4 Meuons and their Properties.....151
6.5 Production and Properties of Pi-Mesons... 153
6.6 Strangeness..... 155
6.7 K-Mesons and Hyperons..... 156
6.8 Charmed Quark..... 158
6.9 Review Questions and Problems..... 159
7 Detectors and Accelerators..... 161
7.1 Ionization Chamber..... 161
7.2 Proportional Counter..... 163
7.3 Geiger Muller Counter..... 165
7.4 Wilson's Cloud Chamber..... 168
7.5 Scintillation Counter..... 169
7.6 Bubble Chamber..... 173
7.7 Nuclear Emulsion Counter..... 175
7.8 Particle Accelerators..... 176
7.9 Electrostatic Accelerators..... 178
7.9.1 Cockcroft-Walton Accelerator..... 178
7.9.1 Tandem Accelerator..... 179
7.9.1 Van de Graff Accelerator..... 180
7.10 Linear Accelerator..... 182
7.11 Cyclotron..... 184
7.12 Betatron..... 188
7.13 Colliding Beam Accelerators..... 190
7.14 Review Questions and Problems..... 193
8 Neutron Physics and Nuclear Fission..... 195
8.1 Discovery of the Neutron..... 195
8.2 Neutron Sources..... 197
8.2.1 Radioactive Neutron Sources.....197
8.2.2 Photo-Neutron Sources..... 199
8.2.3 Charged Particles Neutron Sources... 200
8.2.4 Reactor Sources..... 201
8.3 Neutron Detectors..... 202
8.3.1 Slow Neutron Detectors..... 202
8.3.2 Fast Neutron Detectors..... 205
8.3.3 Intermediate Neutron Detectors..... 206
8.4 Neutron Capture..... 207
8.5 Classification of Neutron Base on Energy.. 209
8.6 Slowing Down of Fast Neutron..... 211
8.7 Nuclear Fission..... 213
8.8 Bohr and John Wheeler Theory of Fission. 217
8.9 Neutron Induced Fission Reaction..... 221
8.10 Nuclear Chain Reaction..... 228
8.11 Types of Nuclear Reactors..... 229
8.12 Nuclear Reactors..... 235
8.13 Review Questions and Problems..... 237
9 Thermonuclear Reactions..... 241
9.1 Fusion Process and its Mechanisms..... 241
9.2 Nuclear Fusion..... 242
9.3 Energy Sources in Stars..... 247
9.4 Controlled Thermonuclear Reactor..... 249
9.5 The Possibility of a Fusion Reactor..... 250
9.6 Plasma Confinement Problem..... 251
9.7 TOKAMAK (Toroidal Magnetic Chamber)... 255
9.8 Review Questions and Problems..... 256

1 Equilibrium Thermodynamics 01
1.1 Introduction 01
1.2 Basic Postulates of Equilibrium 03
1.3 Fundamental Equations and Equation 08
1.4 Response Functions 10
1.5 Reduction of Derivatives 16
1.6 Thermodynamic Potentials 19
1.7 Maxwell Relations 22
1.8 System with Variable Number of 24
1.9 The Grand Potential 28
1.9.1 Condition for Chemical Equilibrium 28
1.10 The Clausius-Clapeyron Equation 29
1.11 (Review Q.) (Solved Problems) (MCQ's) 31

2 Elements of Probability Theory 34
2.1 Probability 34
2.2 Probability Definitions 36
2.3 The Central Limit Theorem 42
2.4 Some Important Probability Distributions 43
2.5 Postulates of Classical Statistical Mechanics 48
2.6 Entropy and Thermodynamical Probability 49
2.7 The H Theorem 52
2.8 Carnot Engine 58
2.8.1 Carnot's Theorem 61
2.9 (Review Q.) (Solved Problems) (MCQ's) 62

3 Formulation of Statistical Methods 63
3.1 Phase Space 63
3.2 Microstates and Macrostates 64
3.3 Priori Assumption 66
3.4 Maxwell-Boltzmann Statistics 67
3.5 The Most Probable Distribution 70
3.6 Evaluation of Constants α and β 74
3.7 Maxwell Distribution of Molecular Speed 77
3.8 Bose Einstein Distribution 78
3.9 Fermi Dirac Distribution 81
3.10 Canonical Ensemble 85
3.11 Relation of Thermodynamic 88
3.12 The Grand Canonical Ensemble (G.C.E) 92
3.13 The Grand Partition Function 93
3.14 (Review Q.) (Solved Problems) (MCQ's) 96

4 Partition Function 100
4.1 Equipartition of Energy 100
4.2 Harmonic Oscillator 103
4.3 Canonical Ensemble 107
4.4 A System in Contact with Heat Bath 107
4.5 Partition Function 110
4.6 The Condition for Thermal Equilibrium 111
4.7 Factorizing the Partition Function 112
4.8 Two Level System 113
4.9 Single Particle in One Dimension Box 116
4.10 (Review Q.) (Solved Problems) (MCQ's) 119

5 Statistical System 120
5.1 The Paramagnetic Gas 120
5.2 Quantum Mechanical Paramagnetic 123
5.3 Black Body Radiation 125
5.4 Density of States in k-space 131
5.5 Distribution of Speed of Particles in 133
5.6 (Review Q.) (Solved Problems) (MCQ's) 137

6 Statistical Mechanics of Interacting System 140
6.1 Lattice Vibrations in Solids 140
6.2 Intermolecular Forces 145
6.3 van der Waals Equation 148
6.4 Alternative formulation of van der 150
6.5 Mean Field Theory 155
6.6 Identical Particles 160
6.7 Wave Function 161
6.8 Boson Particles 162
6.9 Fermions 163
6.10 The Partition Function for Identical 163
6.11 (Review Q.) (Solved Problems) (MCQ's) 134

7 Advanced Topics 166
7.1 The Density Matrix approach 166
7.2 The Bose-Einstein Condensation 171
7.3 Fluctuations 178
7.4 (Review Q.) (Solved Problems) (MCQ's) 184

1 Elementary Particles....01
1.1 Historical Perspective 01
1.2 Introduction to Mechanics 04
1.3 Brief Survey of Newtonian Mechanics....07
1.3.1 Mechanics of a Single Particle....07
1.3.2 Mechanics of a System of Particles....12
1.4 Constraints 18
1.4.1 Equations of Constraints 19
1.4.2 Degrees of Freedom 19
1.4.3 Generalized Coordinates 20
1.4.4 Generalized Velocity 21
1.4.5 Generalized Force 22
1.4.6 Actual and Virtual Displacements 23
1.4.7 Principle of Virtual Work 23
1.5 D'Alembert's Principle 24
1.6 Lagrange's Equations 25
1.7 Applications of Lagrange's Equations 29
1.7.1 Motion of a Particle in Space....30
1.7.2 Motion of a Particle in Polar 32
1.7.3 Atwood Machine 36
1.7.4 Lagrange's Equation for a Simple 38
1.8 Review Questions and Problems....40
2 Variational Principles....44
2.1 Hamilton's Principle 44
2.1.1 Calculus of Variations 46
2.2 Applications of Hamilton's Principle 49
2.2.1 Shortest Distance Between Two 49
2.2.2 Minimum Surface of Revolution 51
2.3 Derivation of Lagrange's Equation 53
2.4 Review Questions and Problems....55
3 Two Body Central Force Problems....57
3.1 Central Force 57
3.1.1 Motion of a Particle under the 58
3.1.2 Two Body Central Force Problems....60
3.1.3 To Find an Orbit under an Inverse....61
3.2 Kepler's Laws 64
3.3 Laboratory and Center of Mass....70
3.3.1 The Equivalent One Dimensional....74
3.3.2 Scattering in a Central Force Field....78
3.4 Definition of Scattering Cross-Section....84
3.5 Introduction to the General Theory of....85
3.6 Review Questions and Problems....89
4 Kinematics of Rigid Body....92
4.1 Rigid Body Motion 92
4.2 Orthogonal Transformations 93
4.3 Eulerian Angles 96
4.4 Euler's Theorem 100
4.5 The Coriolis Force 104
4.6 Review Questions and Problems....107
5 The Rigid Body Equations of Motion....109
5.1 Angular Momentum 109
5.1.1 Tensors and Dyadics 112
5.2 The Moment of Inertia 114
5.2.1 Parallel Axis Theorem 115
5.3 Rigid Body Problems and Euler's 116
5.4 The Euler Angles 120
5.5 Euler's Theorem on the Motion of 125
5.6 Review Questions and Problems....131
6 Hamilton's Equations of Motion....133
6.1 Generalized Momentum 133
6.2 Hamilton's Equations and Hamiltonian H...134
6.2.1 Derivation of Hamilton Equations 137
6.3 Cyclic Coordinates and General 140
6.4 Legendre Transformation 141
6.5 Canonical Transformations 143
6.6 The Harmonic Oscillator 153
6.7 Review Questions and Problems....155
7 Canonical Transformations....157
7.1 Examples of Canonical Transformations....157
7.2 Lagrange and Poisson Brackets 163
7.3 Fundamental Poisson Brackets 168
7.4 Poisson's Theorem 172
7.5 Liouville's Theorem 178
7.6 Routh's Procedure 181
7.7 Review Questions and Problems....184

1.1.1 Magnetic Fields 02
1.2 The Definition of Magnetic Induction 04
1.3 Forces on Current Carrying Conductors 06
1.4 Biot-Savart's Law 08
1.5 Applications of Biot-Savart's Law 10
1.6 Ampere's Circuital Law 16
1.7 The Magnetic Vector Potential 20
1.8 The Magnetic Scalar Potential 26
1.9 The Magnetic Field of Distance Circuit 28
1.10 Magnetic Flux 32
1.11 (Review Q.) (Solved Problems) (MCQ's)..... 33

2 Magnetic Properties of Matter 38
2.1 Magnetization 39
2.2 Magnetic Field Produced by 44
2.3 Magnetic Scalar Potential 48
2.4 Sources of the Magnetic Field and 52
2.5 Magnetic Susceptibility and Permeability 54
2.6 Hystersis 57
2.7 Boundary Conditions on Field Vectors 59
2.8 Electromagnetic Induction 64
2.8.1 Faraday's Law of Electromagnetic 64
2.8.2 Lenz's Law 67
2.9 Self Induction 68
2.10 Mutual Induction 70
2.11 The Neumann Formula 73
2.12 (Review Q.) (Solved Problems) (MCQ's)..... 74

3 Maxwell's Equations 79
3.1 The Generalization of Ampere's Law..... 79
3.1.1 Displacement Current 84
3.2 Maxwell's Equations and the Empirical 85
3.3 Electromagnetic Energy 89
3.4 The Wave Equation..... 95
3.5 Wave Equation with Sources 98
3.6 Retarded Scalar and Vector Potentials 101
3.7 Lorentz Condition 103
3.8 (Review Q.) (Solved Problems) (MCQ's)..... 106

4 Applications of Maxwell's Equations 112
4.1 Plane Monochromatic Waves in Non..... 112
4.1.1 E and H for an Electromagnetic 120
4.1.2 Propagation of EM Waves in 122
4.1.3 Velocity of EM Waves in Non 124
4.2 Polarization 126
4.3 Energy Density and Flux 130
4.4 Plane Electromagnetic Waves in 132
4.5 Reflection and Transmission at Normal 136
4.6 Reflection and Transmission at Oblique..... 138
4.7 Brewster's Angle 143
4.8 Critical Angle 145
4.8.1 Snell's Law 145
4.9 Interference of Two Electromagnetic 147
4.10 Waveguides..... 150
4.11 Cavity Resonator 152
4.12 (Review Q.) (Solved Problems) (MCQ's).. 154

5 Optical Dispersion in Materials 160
5.1 Drude Lorentz Harmonic Oscillator..... 160
5.1.1 Lorentz Oscillator Equation 161
5.2 Resonance Absorption by Bound 165
5.3 Cauchy's Relation 167
5.4 The Drude Free Electron Theory..... 169
5.4.1 Advantages of the classical free 175
5.4.2 Drawbacks of classical free 175
5.4.3 Quantum Concepts 175
5.4.4 Quantum Free Electron Theory 176
5.5 The Kramers-Kronig Relation 177
5.6 Radiation from an Oscillating Dipole 179
5.7 Non Uniform Polarization / Electric 184
5.8 Reflection and Rarefaction on the 185
5.9 Case of Linear Polarization in Plane of 186
5.10 (Review Q.) (Solved Problems) (MCQ's)...187

6 Electrodynamics and Relativity..... 191
6.1 Special Theory of Relativity 192
6.2 Einstein's Postulates 194
6.3 Lorentz Transformation 195
6.4 Structure of Space-Time 200
6.5 Proper Time and Velocity 206
6.6 Relativistic Mechanics 209
6.6.1 Relativistic Kinematics 209
6.6.2 Relativistic Dynamics 211
6.6.3 Relativistic Energy 213
6.6.4 Relativistic Momentum 215
6.7 Relativistic Electrodynamics 218
6.7.1 Magnetism as a Relativistic Phenomenon. 218
6.8 The Field Tensor 221
6.9 Electrodynamics in Tensor Rotation 224
6.10 (Review Q.) (Solved Problems) (MCQ's)...228

5 Counters 82
5.1 Asynchronous Counters (Ripple Counters).. 82
5.2 Synchronous Counters 86
5.3 Design of Synchronous Counter 89
5.4 Up/Down Synchronous Counter 94
5.5 Cascaded Counters 95
5.6 Counter Applications 96
5.7 Review Questions 98
6 Programmable Logic Devices and 99
6.1 Programmable Logic Devices(PLDs) 99
6.2 Simple Programmable Logic Device 100
6.3 Complex Programmable Logic Devices 104
6.4 Field Programmable Gate Arrays (FPGAs).. 104
6.5 Review Questions 106
7 Integrated Circuit and Technologies 107
7.1 Fixed Function Logic Devices 107
7.2 Basic Performance and Characteristics..... 112
7.2.1 Propagation Delay Time 112
7.2.2 DC Supply Voltage (licc) 113
7.2.3 Power Dissipation 113
7.2.4 Input and Output Logic Levels 114
7.2.5 Noise Immunity (Tolerate) 115
7.2.6 Speed-Power Product(SPP) 116
7.2.7 Fan-out and Loading 117
7.3 CMOS Circuits 120
7.4 RTL and DTL Circuts..... 125
7.5 TTL(Bipolar) Circuit 126
7.6 Comparison of TTL & CMOS Performance.. 131
7.7 Emitter-Coupled Logic(ECL) Circuits 131
7.8 Interfacing (Connecting) Logic Families 133
5.9 Review Questions 137
8 Shift Registers 138
8.1 Shift Register Operations..... 138
8.2 Types of Shift Register Data Inputs/Outputs 139
8.3 Bidirectional Shift Registers 142
8.4 Shift Register Counters 144
8.5 Applications of Shift Register 146
8.6 Review Questions 148
9 Signal Conversion 149
9.1 Methods of Digital-to-Analog Conversion.. 149
9.2 Analog-to-Digital Conversion 158
9.3 Methods of Analog-to-Digital Conversion 160
9.4 Review Questions 168
10 Functions of Combinational Logic 169
10.1 Decoders 169
10.2 Encoders 174

10.3 The Data Selection Function 175
10.3.1 Multiplexers (Data Selectors)..... 176
10.3.2 De-Multiplexer (DEMUX)..... 180
9.4 Review Questions..... 182
11 Introduction to Computer and Memories 183
11.1 Computer 183
11.2 Types of Computer 185
11.3 Microcontroller and Embedded..... 186
11.4 Semiconductor Memory 186
11.4.1 The Random-Access Memory.....187
11.4.2 The Read-Only Memory(ROM)..... 193
11.5 The Flash Memory 195
11.6 Review Questions..... 198

1 Introduction to Optics 02
1.1 History of Optics 02
1.2 Optics in Physics 06
1.3 Laws of Geometrical Optics 07
1.4 Aberration 14
1.5 Coma 16
1.6 Astigmatism 17
1.7 Total Internal Reflection 18
1.8 Optical Fiber 20
1.9 Review Questions 21
1.10 Solved Problems 22

2 Wave Motion 24
2.1 Waves 24
2.2 One Dimensional Wave 27
2.3 Harmonic Waves 31
2.4 Plane Waves 41
2.5 Three Dimensional Differential Wave 47
2.6 Spherical Wave 49
2.7 Cylindrical Waves 53
2.8 Scalar and Waves 54
2.9 Review Questions 56
2.10 Solved Problems 56

3 Maxwell Equations in Free Space 59
3.1 Maxwell Equations in Free Space 59
3.2 Electromagnetic Waves 63
3.3 Plane Wave as Electromagmetic 66
3.4 Energy and momentum 69
3.4.1 The Poynting Vector 69
3.5 Non-Conducting (Dielectric) Media 72

1 **Introduction to Plasma** 01
1.1 Definition of Plasma 05
1.2 Maxwellian Distribution 06
1.3 Debye Shielding 13
1.4 Plasma Parameter 19
1.5 Applications of Plasma Physics 20
1.6 Review Questions Solved Problems 25

2 **Single Particle Motion** 27
2.1 Motion of Charge Particles in Static 27
2.2 Gravitational Drift 36
2.3 Grad *B* Drift ($\nabla B \perp B$) 38
2.4 Curvature Drift 41
2.5 Time Varying Electric Field 45
2.6 Time Varying Magnetic Field 49
2.7 Review Questions Solved Problems 52

3 **Plasma as Fluid** 54
3.1 Plasma Response to Field and Fluid 54
3.2 Equation of Motion 55
3.3 Equation of Continuity 59
3.4 Maxwellian Equations 60
3.5 Equation of State 61
3.6 Fluid Drift Perpendicular to *B* 62
3.7 Fluid Drift Parallel to *B* 64
3.8 Review Questions Solved Problems 67

4 **Plasma in Waves** 69
4.1 Representation of Waves 69
4.2 Group Velocity 71
4.3 Plasma Oscillation 73
4.4 Electron Plasma Wave 76
4.5 Sound Waves 80
4.6 Ion Waves or Acoustic Plasma Wave 83
4.6.1 Properties of Ion Sound Wave 85
4.7 Electrostatic Electron Oscillations 85
4.7.1 Upper Frequency of Plasma 88
4.8 Electrostatic Ion Waves Perpendicular 92
4.9 Review Questions Solved Problems 98

5 **Plasma Confinement** 100
5.1 Introduction to Controlled Fusion 100
5.2 Basic Nuclear Fusion Reactions 102
5.3 Reaction Rate and Power Density 105
5.4 Radiation Losses 106
5.5 TOKAMAK (Toroidal Magnetic Chamber) 112
5.6 Review Questions Solved Problems 114

1 Electric Charge and Electric Force..... 01
1.1 Electric Charge..... 01
1.2 Applications of Electrostatic Force..... 03
1.3 Coulomb's Law..... 04
1.4 Electric Field Intensity (E)..... 07
1.4.1 Electric Field Intensity Due to Point....07
1.4.2 Electric Field Due to Continuous..... 08
1.5 The Electric Dipole Law..... 09
1.6 Electric Field for Continuous Charge..... 10
1.7 Electric Field Due to Ring of Charge..... 12
1.8 Electric Field Due to Charged Disk..... 13
1.9 Torque on a Dipole in an Electric Field..... 15
1.10 Potential Energy of an Electric Dipole..... 15
1.11 Electric Flux..... 17
1.12 Gauss's Law..... 18
1.13 Applications of Gauss's Law..... 19
1.13.1 Electric Field Intensity Due to Point..19
1.13.2 Electric Field Due to Continuous.....21
1.13.3 Electric Field Due to Continuous.....22
1.14 Gauss's Law (Spherical Symmetry)..... 25
1.15 Charged Isolated Conductor..... 26
2 Electric Potential and Electric Current.....29
2.1 Electric Potential Energy Difference..... 29
2.2 Absolute Electric Potential Energy..... 30
2.3 Electric Potential Due to Point Charge..... 30
2.4 Potential Due to Electric Dipole..... 32
2.5 Potential Due to Continuous Charge..... 33
2.6 Potential Due to Charged Disk..... 34
2.7 Calculating Field from the Potential..... 35
2.8 Potential and Field Inside and Outside..... 36
2.9 Surface Charge Density for an Isolated..... 37
2.10 Electric Current..... 39
2.11 Drift Velocity..... 40
2.12 Electrical Resistance..... 41
2.13 Ohm's Law..... 43
2.14 Energy Transfer in Electric Circuit..... 46
3 Electromagnetic Induction and Maxwell's.....48
3.1 Magnetic Field..... 48
3.2 Force on a Current Carrying Conductor..... 49
3.3 Force On Moving Charged Particle In..... 51
3.4 Motion of Charged Particle in an Electric...53
3.5 Torque on a Current Loop..... 54
3.6 The Magnetic Dipole Moment..... 55
3.7 Biot-Savart Law..... 57
3.8 Application of Biot-Savart Law..... 58
3.9 Ampere's Law..... 59
3.10 Application of Ampere's Law..... 61
3.11 Magnetic Flux..... 63
3.12 Faradays Law of Electromagnetic..... 64
3.13 Lenz law..... 65
3.14 Lenz Law and Conservation of Energy..... 66
3.15 Motional emf..... 67
3.16 Magnetization..... 68
3.17 Magnetic Materials..... 70
4 Optical Dispersion in Materials..... 73
4.1 Semi-conductors..... 73
4.2 Types of Semiconductors..... 74
4.2.1 Intrinsic Semiconductors..... 74
4.2.2 Extrinsic Semiconductors..... 75
4.3 PN-Junction..... 76
4.4 Transistor..... 78
4.4.1 NPN-Transistor..... 80
4.5 Amplifier..... 83
5 Modern and Nuclear Physics..... 87
5.1 Bohr's Theory of Hydrogen Atom..... 87
5.2 Black Body Radiation..... 91
5.3 Photoelectric Effect..... 95
5.4 Compton Effect..... 99
5.5 LASER..... 101
5.5.1 Spontaneous Emission..... 101
5.5.2 Stimulated Emission..... 102
5.5.3 Absorption..... 104
5.6 Radioactive Decay..... 105
5.7 Nuclear Fission..... 107
5.8 Nuclear Fusion..... 109
5.9 Controlled Thermonuclear Fusion..... 110
6 Waves and Oscillations..... 111
6.1 Interference..... 111
6.2 Young's Double Slit Experiment..... 111
6.3 Interference in Thin Films..... 114
6.4 Diffraction and Wave Theory of Light..... 115
6.5 Diffraction by a Single Slit..... 116

1 Overview and Framing of the Course 02
2 Climate Change 07
2.1 Introduction 07
2.1.1 Why is the Climate Changing? 08
2.1.2 What are the Impacts of Climate 09
2.2 Framing Climate Change 09
2.2.1 How can we tackle this problem 10
2.3 Green Home Effect 10
2.4 What is Climate Change? 14
2.4.1 The 5 Greatest Challenges to 15
2.5 Geologic History and Planetary 17
2.6 Ocean Currents and Global Warming 20
2.7 Wind Patterns Affecting Global 23
2.8 Ecosystem 24
2.9 Projection of Future Global Climate 28
2.10 Measuring Anthropogenic Climate 31
2.11 General Circulation Models (GCMs) 33
2.11.1 Carbon Emission Scenario 35
2.12 Environmental Sustainability 37
2.13 Review Questions 40
3 Energy 44
3.1 Energy Definitions 44
3.2 Forms of Energy 46
3.3 Inter-Conversion of Energy 47
3.4 Physics of Generators 48
3.5 Sustainable Energy Systems 49
3.6 Photoelectric Effect 53
3.7 Sources of Energy 59
3.8 Problems with Fossil Fuel Usage 60
3.9 Renewable vs Non-renewable Energy 61
3.9.1 Benefits of Renewable Energy 62
3.9.2 Drawbacks to Renewable Energy 62
3.10 An introduction to Energy Band gaps 63
3.11 Energy Future 66
3.12 Review Questions 69
4 Human Survival and Infectious Diseases 73
4.1 Infectious Diseases 73
4.2 Types Infectious Diseases 75
4.3 The History of Germs, Vaccine and 76
4.3.1 Germs 76
4.3.2 Vaccine 80
4.3.3 Disease 81
4.4 Evolution by Natural and Artificial 81
4.5 Viruses Are Crossing Species Barrier 84
4.6 Anti-biotic Resistance 85
4.7 Human Psychology 88
4.7.1 Fast facts about psychology 88
4.7.2 Branches of psychology 89
4.8 Human Interaction and Disease 91
4.8.1 Wildlife and Disease Spread 92
4.8.2 Emerging Infectious Diseases 92
4.8.3 Risk of Emerging Infectious Diseases 93
4.8.4 Travel-related Infectious Diseases 93
4.8.5 Measures to Reduce Travel-related 93
4.9 Review Questions 94
5 Science, Technology and Society 98
5.1 An Introduction to How Science 98
5.2 What is STS? 99
5.3 Complex Web of Science, Politics 101
5.4 Seven Global Challenges and Factors 101
5.5 New Science of Complex Systems 104
5.6 Development of Science in Certain 105
5.7 Scientific Funding 111
5.7.1 Science Funding is a Mess 113
5.8 Technological Progress and Ethical 114
5.8.1 Five Big Ethical Constraints 114
5.9 Human experiences as Data 116
5.10 Short Questions 118
6 The Future of Science, Nano-technology 123
6.1 What is Nanotechnology? 123
6.2 Biotechnology 125
6.3 Future of Foods: Agricultural 128
6.4 Food Consumption and Nutrition 131
6.5 Genetic Modification: CRISPR, Gene 134
6.6 Gene Therapy 136
6.7 Exobiology - Life and human outside 137
6.8 Short Questions 140
Index 143

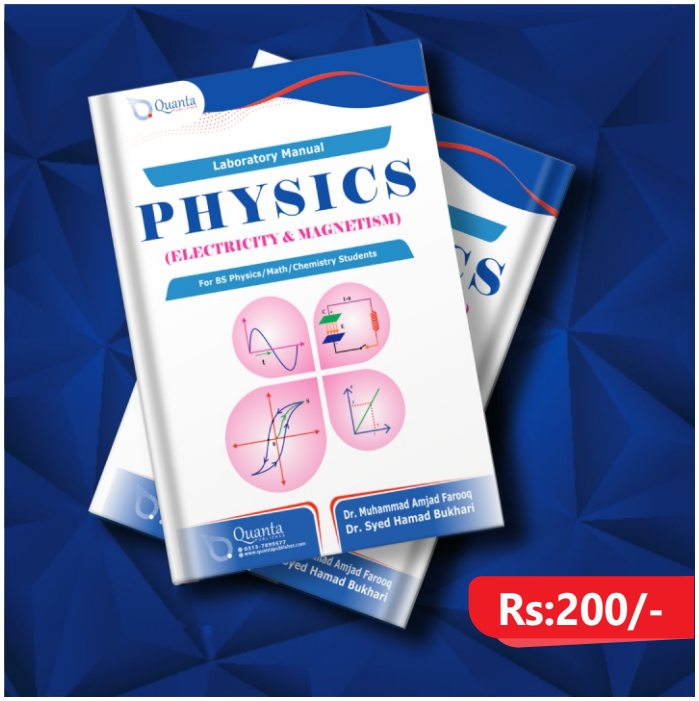
Exp# 01. (b). Modulus of Rigidity 04
Exp# 01. (c). Modulus of Rigidity (Oscillating 07
Exp# 02. Darning Features of an Oscillating 10
Exp# 03. Co-efficient of Viscosity..... 14
Exp# 04. Surface Tension of Water 17
Exp# 05. (a). Value of Acceleration due to 21
Exp# 05. (b). Value of Acceleration due to 25
Exp# 06. Dependance of Centripetal Force on 28
Exp# 07. Traveling Wave and Measurement 32
Exp# 08. Moment of inertia of a Solid/ Hollow 35
Exp# 09. Conservation of Energy 39

Exp# 01. Thermal emf of a Thermocouple 01
Exp# 02. Temperature Coefficient of 04
Exp# 03. Mechanical Equivalent of Heat 07
Exp# 04. Determine the Stefan Constant 10
Exp# 05. Calibration of Thermocouple by 13
Exp# 06. Determine the Frequency of AC 16
Exp# 07. Determine the Distance Using 19
a) Vertical Distance Between two 19
b) Horizontal Distance Between 22
c) Height of an Inaccessible 25
Exp# 08. Measurement of Wavelength of 28
Exp# 09. Determine the Wavelength of 31
Exp# 10. Determine the Wavelength of 34
Exp# 11. Determine the Resolving Power 37
Exp# 12. Determine the Specific Rotation 40
Exp# 13. Study the Parameter of Waves..... 43
Exp# 14. Thermal Conductivity of..... 44
a) Thermal Conductivity of Bad 44
b) Thermal Conductivity of Good 47
Exp# 15. Study Law of Stretched String..... 50
Exp# 16. Determine the Stopping..... 53



Exp# 01. Measurement of Resistance 01
Exp# 02. (a) Conversion of Moving Coil..... 04
Exp# 02. (b) Conversion of Moving Coil..... 08
Exp# 03. Photo Emission and Plank's..... 12
Exp# 04. (a) Calibration of a Voltmeter..... 16
Exp# 04. (b) Calibration of an Ammeter..... 19
Exp# 05. Measure the Charge Density of..... 22
Exp# 06. Comparison of Capacities by..... 24
Exp# 07. Study the B.H Curve and Measure..... 27
Exp# 08. Measure the Low Resistance..... 31
Exp# 09. Measure of Resonance Frequency..... 34
Exp# 10. Measure of Resonance Frequency..... 37
Exp# 11. (a) Study the Parameter of Wave 40
Exp# 11. (b) Horizontal and Vertical Sensitivity..... 45
Exp# 12. (a) Measurement of self-inductance..... 47
Exp# 12. (b) Measurement of mutual-inductance... 52
Exp# 13. Study of Electric Current by Black 56
Exp# 14. Study the Network Theorem..... 59
Exp# 15. Study the Application of Lorentz..... 66

Exp# 01. Charge to Mass Ratio 01
Exp# 02. Ionization of Potential..... 04
Exp# 03. Characteristics of Semiconductor..... 07
Exp# 04. Setting up of Half Wave 10
Exp# 05. Setting up a Single Stage..... 15
Exp# 06. Setting up a Transistor..... 19
Exp# 07. Setup and Study Various..... 22
a) Construct two Input 22
b) Construct two Input 24
c) Construct two Input 26
d) Construct two Input 28
e) Construct two Input..... 30
Exp# 08. Setup Electronic Switching 33
Exp# 09. Study the Characteristics..... 35
Exp# 10. Study the Characteristic..... 38
Exp# 11. Determine the Absorption..... 41
Exp# 12. Determine the Range..... 44
Exp# 13. Mass Absorption Coefficient 46

Exp# 01. Cauchy's Constant 01
Exp# 02. Dielectric Constant 08
Exp# 03. Planck's Constant 11
Exp# 04. Michelson interferometer 14
Exp# 05. Stefan's Constant 18
Exp# 06. Determination of Velocity of Light 22
Exp# 07. X-Ray Diffraction (XRD) 24
Exp# 08. Hall Effect 28
Exp# 09. Band Gap in a Semiconductor 33
Exp# 10. B.H Curve 35
Exp# 11. Zeeman Effect 40
Exp# 12. Charge to Mass Ratio e/m of Electron 42
Exp# 13. Absorption Coefficient by G.M. counter ... 45
Exp# 14. Franck-Hertz Experiment 48

Exp# 1. Half Wave Rectifier 1
Exp# 2. Full Wave Rectifier 6
Exp# 3. Clipping Circuits 14
Exp# 4. Clamping Circuits 18
Exp# 5. Transistor Common Emitter 22
Exp# 6. Emitter Follower 26
Exp# 7. RC Phase Shift Oscillator 30
Exp# 8. Astable Multivibrator 35
Exp# 9. Bistable Multivibrator 39
Exp# 10. Monostable Multivibrator 42
Exp# 11. Operational Amplifier 45
