TEACH YOURSELF

COMPUTATIONAL

PHYSICS

(C + + & M A T L A B)

1st Edition

For **BS/M.Sc Physics** students of all Pakistani Universities/Colleges

Ahsan Javed

PhD Scholar

Lecturer, Department of Physics

Govt. Associate College Kalyana, Pakpattan

&

Dr. Syed Hamad Bukhari

Assistant Professor

Department of Physics

G.C. University Faisalabad, Sub-Campus, Layyah

Quanta Publisher, 2660/6C Raza Abad, Shah Shamas, Multan.

Contents

1	Programming:	
	The Art of Digital Creation	1
1.1	Programming	2
1.2	Programming Languages	2
1.2.1	Low-level Languages	2
1.2.2	High-level Languages	3
1.2.3	Code Translation (Compiler, Interpreter, Assembler)	5
1.3	Algorithm	6
1.3.1	Formation of an Algorithm	6
1.3.2	Algorithm to find sum and average of five given numbers	7
1.3.3	Algorithm to determine the larger one out of the three given numbers	7
1.3.4	Algorithm to find acceleration of a moving object with given mass & applied force	8
1.4	Flowchart	9
1.4.1	Flowchart Symbols	10
1.4.2	A flowchart to convert Temp. from Celsius to Fahrenheit	10
1.4.3	Flowchart to display the large one out of three numbers	11
1.4.4	Difference Between Algorithm and Flowchart	12
1.5	Scientific Programming Methodology	12
1.6	Simulation	13
1.6.1	Monte Carlo Methods	13
1.6.2	Molecular Dynamics (MD)	14
1.6.3	Artificial Intelligence (AI) & Machine Learning (ML)	14
1.6.4	Simulation Softwares	14
1.7	Computer Graphics	15
1.8	Essential Terminologies	16
1.8.1	Hardware vs Software	16
1.8.2	Peripheral Devices	17
1.8.3	CPU vs GPU	17
1.8.4	CLI vs GUI	18
1.9	Review Questions	18
2	Exploring the World of C++	19
2.1	Getting Started with IDE	19
2.1.1	DEV-C++	20
2.2	General Syntax (Structure) of a C++ Program	20

2.2.1	A C++ Program to display age taking input from user	22
2.3	Data Types	23
2.3.1	A C++ Program to nd average of three Numbers	23
2.3.2	A C++ Program that testies TWIN PARADOX	25
2.4	Relational Operators	26
2.5	Control Structure in C++	27
2.6	Selection	27
2.6.1	Syntax for if	27
2.6.2	If-else	27
2.6.3	If-else-if	28
2.6.4	A C++ program to compare two numbers	29
2.6.5	A C++ program to input marks from user and then Grade	30
2.6.6	switch statement	31
2.6.7	Modulus (%) Operator	32
2.6.8	Logical NOT (!) Operator	32
2.6.9	Logical OR ()	33
2.6.10	Logical AND (&&)	33
2.7	Repetition: Loops	33
2.7.1	for Loop	33
2.7.2	while Loop	34
2.7.3	A C++ program to display rst 100 natural numbers and then nd their SUM. . .	34
2.7.4	A C++ program to print out table of n (n from user)	35
2.7.5	A C++ program to print out factorial of n (n from user)	36
2.7.6	Write a program in C++ for the Fibonacci Series (0,1,1,2,3,5,8,...)	36
2.7.7	Compute the time period T for L varying b/w 0.8 to 1.6 m in steps of 0.05m. . . .	37
2.8	Jump Statement	37
2.8.1	goto statement	37
2.8.2	break statement	38
2.8.3	continue statement	39
2.9	Review Questions	40
3	Customizing Code: User-Dened Functions and Arrays	41
3.1	Functions in C++: Built-in and User-dened	41
3.1.1	A C++ program to develop a User-dened fun. to nd cube of a number	43
3.1.2	User-dened function to nd sum of square & square root of a number	44
3.1.3	A C++ program to develop a function for $(a+b)^2$	44
3.2	Arrays	47
3.2.1	Determine the magnitude of vector $2i + 3j + 4k$ in C++	47
3.2.2	A C++ program to calculate velocity and also to print out maximum velocity . . .	48
3.2.3	Scalar Product of two vectors $A = 4i + 3j - 2k ; B = 2i - 2j + 2k$	50
3.3	Sorting of Arrays	51
3.3.1	C++ program to sort an array [5,2,9,1,3] in ascending order	51
3.3.2	A C++ program to sort an array in descending order	52
3.3.3	Compile a C++ program to nd the MEDIAN of a user-input array	53
3.4	Random Numbers	53
3.4.1	A C++ program to generate a random array of ascedningly sorted ten numbers . .	54
3.4.2	Random Walk	55
3.5	Multi-Dimensional Arrays	57
3.5.1	A program to take input from user and print out a 3×3 matrix	57
3.5.2	Sum and Subtract two 3×3 matrices in DEV-C++	58

3.5.3	A C++ program for Multiplication of two 3x3 matrices	60
3.6	string: Array of char(acters)	61
3.6.1	A C++ program to print out the ASCII value of a character	61
3.6.2	String-handling built-in functions	63
3.7	Essential Terminologies	64
3.7.1	Memory management in C++	64
3.7.2	Types of Errors in Programming	65
3.7.3	Object Oriented Programming (OOP)	65
3.7.4	Generic Programming	66
3.7.5	Pointers	67
3.7.6	getch()	67
3.8	Review Questions	68
4	Numerical Ninjas:	
	Solving Problems with Code	69
4.0.1	Numerical Errors and Instabilities	69
4.0.2	Techniques for removing of Errors	70
4.1	Numerical Integration/Quadrature	71
4.1.1	Trapezoidal Rule	72
4.1.2	Solve $\int_1^6 e^{\frac{1}{x}} dx$ using Trapezoidal Rule	73
4.1.3	Solve $\int_0^1 \frac{e^{-x}}{x} dx$ using Trapezoidal Rule	74
4.1.4	Simpsons 1/3 Rule	75
4.1.5	Solve $\int_1^6 e^{\frac{1}{x}} dx$ using Simpsons 1/3 Rule	75
4.1.6	Simpsons 3/8 rule	77
4.1.7	Solve $\int_1^6 e^{\frac{1}{x}} dx$ using Simpsons 3/8 Rule	78
4.1.8	Booles Rule	79
4.1.9	Weddles Rule	79
4.2	Numerical Dierentiation	80
4.2.1	Compile a C++ program to dierentiate x^2 for $x = 1$	81
4.2.2	Compile a C++ program to dierentiate $\sin(x)$ for $x = 0$	82
4.3	Numerical Methods for ODEs	83
4.3.1	Euler Method	83
4.3.2	Find the Analytical solution of $y = \frac{dy}{dx} = x$ for $x = 1$ with initial condition $y(0) = 0$	84
4.3.3	Using Euler Method, approximate the solution of $y = x$ for $x = 1$ with initial condition $y(0) = 0$ over the interval with step size $h = 0.1$	84
4.3.4	Using Euler Method, approximate the solution of $y = x - y$ for $x = 1$ with initial condition $y(0) = 1$ and $h = 0.1$	86
4.3.5	Euler Improved Method (Heuns Method)	87
4.3.6	Repeat Program 4.3.4 using Euler Improved Method	88
4.3.7	Runge Kutta (fourth-order) Method	91
4.3.8	Repeat Program 4.3.4 using Runge Kutta 4 th order Method	92
4.3.9	Solve the ODE $\frac{dy}{dx} = \frac{x}{x^2+1}$ subject to the initial condition $y(0) = 1$ on the interval $0 \leq x \leq 1$ by using RK method	93
4.3.10	Runge-Kutta-Fehlberg (RKF) Method	94
4.4	Numerical Solution of Nonlinear Equations	95
4.4.1	Newton-Raphson Method	95
4.4.2	Find root of the equation $x^2 - 2x - 2 = 0$ correct up-to 3 decimal places by using Newton Raphson Method	96
4.4.3	Bisection Method	98

4.4.4	Compile a C++ program to solve $f(x) = \sin(x) - 5x + 2$ using Bisection method .	98
4.4.5	Secant Method	100
4.4.6	Solve using Secant method: $f(x) = \sin(x) - 5x + 2$	101
4.5	Solution of Linear System of Equations	103
4.6	Review Questions	104
5	MAT_{rix} LAB_{oratory}	105
5.1	MATLAB Interface	105
5.2	Data Types in MATLAB	107
5.3	Scalars	107
5.3.1	Scalar Operations	107
5.3.2	MATLAB Variables	108
5.3.3	Comment (%) in MATLAB	108
5.3.4	disp() Command	109
5.3.5	fprintf()	109
5.3.6	input() Command	109
5.3.7	format Command	110
5.3.8	Built-in functions for Scalars	110
5.3.9	Rounding functions	112
5.4	Vectors (Arrays)	112
5.4.1	Array Manipulation	112
5.4.2	Array Operations	114
5.4.3	ElementWise Operations	115
5.4.4	Built-in functions for Arrays	116
5.4.5	Current Analysis: Calculate I, I_t, I_{max}, I_{min} in MATLAB	117
5.4.6	Route Analysis: Write a MATLAB program to calculate speed, max., min., and average speed. Also determine the fastest route.	118
5.4.7	Vector Calculus in MATLAB	119
5.5	Matrices (2D Arrays)	122
5.5.1	Matrix Manipulation	122
5.5.2	Matrix Operations	124
5.5.3	Special Matrices in MATLAB	126
5.6	Solving System of Linear Equations	126
5.6.1	Solve the following system of linear equations using (a) Inversion Method (b) Left Division Method (c) Cramers Rule	127
5.6.2	Cable Tension: Write a program to nd out T1, T2 and T3	129
5.7	Eigen values/functions - Quantum Mechanics	130
5.8	Creating Arrays and Matrices	135
5.8.1	Colon (:) method	135
5.8.2	Write a MATLAB program for factorial of given number	137
5.8.3	linspace command	137
5.8.4	rand command	138
5.9	String - Data type	139
5.10	Review Questions	140
6	MATLAB Control Structures (MCS)	141
6.1	Selection	141
6.1.1	Syntax for If	141
6.1.2	Syntax for If else	142
6.1.3	Syntax for If elseif else	142

6.1.4	A MATLAB script to print out pass/fail, based on obtained marks	143
6.1.5	A MATLAB script (.m) to compare two numbers	143
6.2	Repetition: Loops	145
6.2.1	Solve using MATLAB: $\sum_{n=1}^N \frac{1}{n^2}$	145
6.2.2	A MATLAB program to display and sum rst 100 natural numbers	146
6.2.3	Print value of k when $y = 20,000$ for given equation	147
6.2.4	Write a MATLAB program to nd factorial of a number using for-loop	147
6.2.5	Temperature Analysis	148
6.2.6	nd command	149
6.2.7	Cramers Rule Revisited: Solve following set of Eq.s	150
6.3	User Dened Functions	151
6.4	Review Questions	154
7	Seeing is Believing: Data Visualization	155
7.1	Basic 2D (line) Plots	156
7.1.1	Free Fall Motion	160
7.1.2	Write a MATLAB program to calculate and plot x against $f(x)$ for $1 \leq x \leq 20$ where $f(x) = 4x^3 + 5x^2 + 3x + 10$, ($h = 1$)	161
7.1.3	Radio-Active Decay	162
7.1.4	Write a MATLAB program to plot against Aortic pressure value for the equation ..	163
7.1.5	Brownian Motion in MATLAB	164
7.1.6	Plot sine and cosine for $-\pi \leq x \leq \pi$ on same graph	165
7.1.7	Splitting the View: Subplots	166
7.1.8	Plot $e^{-2x} \sin(10x + 5)$ for $0 \leq x \leq 5$ and $ x^3 - 10 $ where $-6 \leq x \leq 6$ (subplot) ...	167
7.1.9	Write a MATLAB program to show forward and reverse properties of a diode using subplot	168
7.1.10	Step Function	169
7.2	Basic 3D Plots	170
7.2.1	A MATLAB program for helix	171
7.2.2	ezplot3	172
7.2.3	Mesh Plots	172
7.2.4	Surf Plots	173
7.3	Exploring More Plotting Functions	174
7.3.1	Animation in MATLAB	174
7.3.2	pause command	174
7.3.3	getframe command	174
7.3.4	Write a MATLAB program to animate helix	175
7.3.5	movie command	176
7.3.6	ginput()	176
7.3.7	gtext()	176
7.3.8	A MATLAB program to select two points on the plot and mention them with a circle. Also add a text to plot.	177
7.4	Review Questions	177
8	Exploring the Physical World through MATLAB Simulations	179
8.1	Importance of Simulations in Physics	179
8.2	Simulating Motion of Objects	180

8.2.1	Projectile Motion: Show that angles of projection, which exceeds or fall short of 45° by equal amounts, the ranges are equal.	180
8.2.2	Range and Height of Projectile: Subplot	182
8.2.3	Gravitational Force An Inverse Square Law	183
8.2.4	Plot Orbit of a Planet around the Sun using Keplers Law	184
8.3	Quantum Mechanics	185
8.3.1	Normalization constant for $\psi(x) = A \sin(x)$, $0 \leq x \leq \pi/2$	185
8.3.2	Plot the probability density function of Harmonic Oscillator	186
8.3.3	Probability density function of Hydrogen Atom (1s)	187
8.4	Electricity and Magnetism	188
8.4.1	Coulomb Force between Charges	188
8.4.2	Electric Field due to a Point Charge	189
8.4.3	Electric Field due to a Dipole	190
8.4.4	Electric Potential due to a Point Charge	191
8.5	Simple Harmonic Oscillator: Show in MATLAB that SHO depict circular motion	192
8.6	Euler Method	193
8.6.1	Euler Equations	193
8.6.2	Freely Falling Object	194
8.6.3	Freely Falling Object in Viscous Medium	196
8.6.4	Euler Method for Simple Harmonic Motion	198
8.6.5	Euler Method for Forced Harmonic Motion	200
8.6.6	Growth and Decay in RC Circuit	203
8.6.7	Growth and Decay in RL Circuit	205
8.6.8	Charge and Current in LC Circuit	207
8.6.9	Motion of Charge Particle in an Electric and Magnetic Field	208
8.7	Calculus	212
8.7.1	Integration	212
8.7.2	Dierentiation	213
8.7.3	Limtis	214
8.7.4	Solving Dierential Equations: dsolve()	215
8.8	Numerical Analysis	216
8.8.1	Numerical Integration	216
8.8.2	Numerical Dierentiation	218
8.8.3	Ordinary Dierential Equations (ODEs)	219
8.9	Polynomials	220
8.9.1	Built-in functions for Polynomials	220
8.9.2	Sum, Subtract, Multiply and Divide the following polynomials: $f(x) = 7x^3 + 2x^2 + 3x + 4$ and $g(x) = 6x^3 + 6x^2 - 5x + 8$	221
8.9.3	solve() command	221
8.10	Review Questions	222
A	Installation: DEV-C++	223
B	Command Line Interface (CLI)	224
C	C++ in Linux: g++	225
D	ASCII Code	226

Chapter 1

Programming:

The Art of Digital Creation

Whether you want to uncover the secrets of the universe, or you just want to pursue a career in the 21st century, basic computer programming is an essential skill to learn.

Stephen Hawking (1942–2018)

Computational Physics is a branch of physics that uses numerical methods and algorithms to solve problems. This can include simulating physical systems, solving differential equations, and analyzing data. It is used in a wide range of areas, such as condensed matter physics, astrophysics, and particle physics. It is an interdisciplinary field that combines physics, applied mathematics and computer science. Computational physics has led us to many breakthroughs i.e. discovery of dark matter¹, imaging of black hole, etc.

¹ In the early 20th century, Swiss astronomer Fritz Zwicky observed that the observed mass of galaxy clusters was not enough to account for the gravitational forces holding them together. He proposed the existence of **Dark Matter** to account for the discrepancy. Dark matter is a mysterious form of matter that is believed to make up about 85% of the universe's mass. The nature and properties of dark matter are not well understood, and it cannot be directly detected with current technology. However, it wasn't until the late 20th century that technology advanced enough to allow for detailed simulations of the universe to be run on supercomputers. These simulations showed that the distribution of matter in the universe matched observations much better when an additional, invisible form of matter was included in the calculations. This provided strong evidence for the existence of dark matter, and has since been confirmed through various other observations and experiments. This has led to the conclusion that dark matter must exist in order to account for the gravitational forces holding galaxy clusters together and the large-scale structure of the universe. The story illustrates the power of computational physics in helping to solve complex problems and make important discoveries in the field of physics. It also shows how simulations can be used to make predictions to be confirmed through experiments.

Chapter 2

Exploring the World of C++

C++ is a valuable asset for physicists, allowing us to model, simulate, and analyze systems with unprecedented accuracy and precision.

C++ creates a strong programming base i.e. if you are good in this, you will be good in other programming languages too.

2.1 Getting Started with IDE

C++ was developed in the early 1980s. It was designed to extend the C programming language and add object-oriented features. C++ has a syntax similar to C but has added features, allowing for more complex and extensible program design. It is regarded as one of the most efficient and widely-used programming languages and is often used for developing complex, high-performance applications.

There are several Integrated Development Environments (IDEs¹) available for C++ i.e., Dev-C++, Microsoft Visual Studio in Windows Operating System (OS), GCC in Linux OS², etc. For this book, we will be using Dev-C++ in **WINDOWS OS**.

¹ **IDE** is a software application that provides comprehensive facilities to computer programmers for software development. An IDE consists of a source code editor, a compiler or interpreter, build automation tools, and a debugger. The purpose of an IDE is to streamline the development process by providing all the necessary tools and features in one place, allowing developers to write, test, and debug code efficiently.

² **Appendix C** to learn how to run a C++ program in LINUX OS

Chapter 3

Customizing Code: User-Dened Functions and Arrays

3.1 Functions in C++: Built-in and User-dened

Built-in functions

Built-in functions in C++ are functions that are part of the C++ standard library and are available for use without the need for additional code or libraries. These functions are already built into the compiler and can be called directly from within the code.

sqrt(x): Returns the square root of a number x.

pow(x, y): Returns x raised to the power of y.

abs(x): Returns the absolute value of a number x.

ceil(x): Returns the smallest integer greater than or equal to x.

max(x, y): Returns the larger of two values x and y.

min(x, y): Returns the smaller of two values x and y.

rand(): Returns a random integer.

sin(x): Computes the sine of an angle x (in **radians**).

log(x): Computes the natural logarithm (base e) of a number x.

log10(x): Computes the base-10 logarithm of a number x.

toupper(): Converts a lowercase character to uppercase.

tolower(): Converts an uppercase character to lowercase.

Chapter 4

Numerical Ninjas: Solving Problems with Code

Numerical analysis is a branch of mathematics that solves continuous problems using numeric approximation. It involves designing methods that give approximate but accurate numeric solutions, which is useful in cases where the exact solution is impossible or prohibitively expensive to calculate. Different numerical techniques are:

1. Numerical Integration Techniques
2. Numerical Differentiation Techniques
3. Numerical Methods for Ordinary Differential Equations (ODEs)
4. Numerical Methods for Solution of Non Linear Equations
5. Numerical Methods for Solution of Linear Equations
6. Numerical Solutions of Partial Differential Equations

4.0.1 Numerical Errors and Instabilities

Error in numerical analysis refers to the difference between the exact (theoretical) value and the approximated value obtained using a numerical method. The error can arise from various sources, such as rounding errors, truncation errors, or numerical instability.

1. **Rounding errors** One common source of approximation errors is the use of finite precision arithmetic, which can cause rounding errors when a floating-point number is approximated by a finite number of binary digits. This can lead to inaccuracies in

Chapter 5

MAT_{rix} LAB_{oratory}

MATLAB (Matrix Laboratory) is a high-level programming language that is used for technical computing, data analysis and visualization. MATLAB was developed by MathWorks and was first released in the 1980s. It is widely used in fields such as engineering, physics, finance and is also popular in education for teaching mathematical and scientific concepts. Advantages of MATLAB include its ease of use, its extensive library of built-in functions, and its ability to handle complex computations.

5.1 MATLAB Interface

To get started with MATLAB, you will need to download and install the software on your computer, and then launch the application.¹ Once you have the application open, you can begin writing code in the MATLAB. The MATLAB Desktop Environment is the graphical user interface (GUI) used to interact with the software.

The major components of the MATLAB interface (as shown in figure 5.1) include:

Command Window: This is the primary interface to MATLAB, where users can enter commands and run code. The Command Window displays the results of commands and allows users to interactively experiment with MATLAB.

Workspace: The Workspace displays variables that are currently in memory. Users can view and manipulate variables in the Workspace.

¹ **MATLAB Mobile** is a companion app that allows users to run MATLAB on their mobile devices, such as smartphones or tablets. The app provides a lightweight version, allowing users to access and run MATLAB code on their mobile devices, as well as view and edit files stored in the MATLAB Drive cloud storage.

Chapter 6

MATLAB Control Structures (MCS)

MATLAB provides various control structures that can be used to control the flow of execution of a program, such as:

1. **Selection** (if, if-else, if-elseif-else)
2. **Repetition** (for, while)

6.1 Selection

Selection refers to the ability to conditionally execute code based on certain conditions.¹

6.1.1 Syntax for If

```
if condition
    % code to be executed if the condition is true
end
```

Here's an example of how you could use if to check if a variable x is greater than 0

```
x = 5;
if x > 0
    disp( x is positive );
end
```

¹ For detail theoretical discussion on Selection/Repetition theory, revisit **Section 2.5**

Chapter 7

Seeing is Believing: Data Visualization

Visualization in MATLAB refers to the process of plotting data in form of graphs, charts, and other types of visual representations. MATLAB is a powerful tool for data visualization, with a variety of built-in functions and options for customizing the plots.

Fig. 7.1. Electrostatic (Coulomb) force as inverse square law

Chapter 8

Exploring the Physical World through MATLAB Simulations

MATLAB can be used to solve real-world physics problems: Many physical systems are too complex to understand through simple mathematical models or experiments alone. Simulations allow physicists to model these systems in great detail, taking into account all the relevant factors that contribute to their behavior. This allows them to gain a better understanding of how these systems work and how they might be manipulated.

8.1 Importance of Simulations in Physics

Predicting Behavior: Simulations can be used to make predictions about the behavior of physical phenomena under different conditions. For example, a simulation of the behavior of particles in a magnetic field could be used to predict how these particles would behave in a particle accelerator. This allows physicists to design experiments that test these predictions and further refine their understanding of physical laws that govern behavior of these systems.

Designing experiments: Simulations can also be used to design experiments that are more efficient and effective. By simulating different experimental setups, physicists can optimize their designs to achieve the best possible results. This can save time and resources, and lead to more accurate and useful data.

4.2.2 A C++ Program that testifies TWIN.....25

2.4 Relational Operators..... 26

2.5 Control Structure in C++..... 27

2.6 Selection..... 27

2.6.1 Syntax for “ if ”..... 27

2.6.2 If-else..... 27

2.6.3 If-else-if..... 28

2.6.4 A C++ program to compare two..... 29

2.6.5 A C++ program to input marks from.....30

2.6.6 switch statement..... 31

2.6.7 Modulus (%) Operator..... 32

2.6.8 Logical NOT (!) Operator..... 32

2.6.9 Logical OR (||)..... 33

2.6.10 Logical AND (&&)..... 33

2.7 Repetition: Loops..... 33

2.7.1 for Loop..... 33

2.7.2 while Loop..... 34

2.7.3 A C++ program to display first 100..... 34

2.7.4 A C++ program to print out table of.... 35

2.7.5 A C++ program to print out factorial.... 36

2.7.6 Write a program in C++ for the..... 36

2.7.7 Compute the time period T for L..... 37

2.8 Jump Statement..... 37

2.8.1 goto statement..... 37

2.8.2 break statement..... 38

2.8.3 continue statement..... 39

2.9 Review Questions..... 40

3 Customizing Code: User-Defined Functions..... 41

3.1 Functions in C++: Built-in and User-defined.. 41

3.1.1 A C++ program to develop a User..... 43

3.1.2 User-defined function to find sum of... 44

3.1.3 A C++ program to develop a function.. 44

3.2 Arrays..... 47

3.2.1 Determine the magnitude of vector.... 47

3.2.2 A C++ program to calculate velocity... 48

3.2.3 Scalar Product of two vectors $A \cdot B = 4i...$ 50

3.3 Sorting of Arrays..... 51

3.3.1 C++ program to sort an array [5,2,9].... 51

3.3.2 A C++ program to sort an array in..... 52

3.3.3 Compile a C++ program to find the..... 53

3.4 Random Numbers..... 53

3.4.1 A C++ program to generate a random.. 54

3.4.2 Random Walk..... 55

3.5 Multi-Dimensional Arrays..... 57

3.5.1 A program to take input from user..... 57

3.5.2 Sum and Subtract two 3x3 matrices.....58

3.5.3 A C++ program for Multiplication of... 60

3.6 string: Array of char(acters)..... 61

3.6.1 A C++ program to print out the ASCII.. 61

3.6.2 String-handling built-in functions.....63

3.7 Essential Terminologies..... 64

3.7.1	Memory management in C++.....	64	5.3.9	Rounding functions.....	111
3.7.2	Types of Errors in Programming.....	65	5.4	Vectors (Arrays)	111
3.7.3	Object Oriented Programming (OOP).....	65	5.4.1	Array Manipulation.....	111
3.7.4	Generic Programming.....	66	5.4.2	Array Operations.....	113
3.7.5	Pointers.....	67	5.4.3	Element-Wise Operations.....	114
3.7.6	getch.....	67	5.4.4	Built-in functions for Arrays.....	115
3.8	Review Questions.....	68	5.4.5	Current Analysis: Calculate I, It.....	116
4	Numerical Ninjas:		5.4.6	Route Analysis: Write a MATLAB.....	117
	Solving Problems with Code.....	69	5.4.7	Vector Calculus in MATLAB.....	118
4.0.1	Numerical Errors and Instabilities.....	69	5.5	Matrices (2D Arrays).....	121
4.0.2	Techniques for removing of Errors.....	70	5.5.1	Matrix Manipulation.....	121
4.1	Numerical Integration/Quadrature.....	71	5.5.2	Matrix Operations.....	123
4.1.1	Trapezoidal Rule.....	72	5.5.3	Special Matrices in MATLAB.....	125
4.1.2	Solve R16 $\int v_x dx$ using Trapezoidal.....	73	5.6	Solving System of Linear Equations.....	125
4.1.3	Simpson's 1/3 Rule.....	75	5.6.1	Solve the following system of linear.....	126
4.1.4	Solve R16 $\int v_x dx$ using Simpson's.....	75	5.6.2	Cable Tension: Write a program to.....	128
4.1.5	Simpson's 3/8 rule.....	77	5.7	Eigen values/functions - Quantum.....	129
4.1.6	Solve R16 $\int v_x dx$ using Simpson's.....	78	5.8	Creating Arrays and Matrices.....	134
4.1.7	Boole's Rule.....	79	5.8.1	Colon (:) method.....	134
4.1.8	Weddle's Rule.....	79	5.8.2	Write a MATLAB program for.....	136
4.2	Numerical Differentiation.....	80	5.8.3	linspace command.....	136
4.2.1	Compile a C++ program to.....	81	5.8.4	rand command.....	137
4.2.2	Compile a C++ program to.....	82	5.9	String - Data type.....	138
4.3	Numerical Methods for ODEs.....	83	5.10	Review Questions	139
4.3.1	Euler Method.....	83	6	MATLAB Control Structures (MCS).....	140
4.3.2	Find the Analytical solution of $y' =$	84	6.1	Selection	140
4.3.3	Using Euler Method, approximate.....	84	6.1.1	Syntax for " If ".....	140
4.3.4	Using Euler Method, approximate.....	86	6.1.2	Syntax for " If else ".....	141
4.3.5	Euler Improved Method (Heun's.....)	87	6.1.3	Syntax for " If elseif else ".....	141
4.3.6	Repeat Program 4.3.4 using Euler.....	88	6.1.4	A MATLAB script to print out pass.....	142
4.3.7	Runge Kutta (fourth-order) Method.....	91	6.1.5	A MATLAB script (.m) to compare.....	142
4.3.8	Repeat Program 4.3.4 using Runge.....	92	6.2	Repetition: Loops	144
4.3.9	Runge-Kutta-Fehlberg (RKF) Method.....	94	6.2.1	for Loop.....	144
4.4	Numerical Solution of Nonlinear Equations.....	95	6.2.2	Solve using MATLAB:.....	144
4.4.1	Newton-Raphson Method.....	95	6.2.3	while Loop	145
4.4.2	Find root of the equation $x^2 - 2x - 2$	96	6.2.4	A MATLAB program to display and.....	145
4.4.3	Bisection Method.....	98	6.2.5	Write a MATLAB program to find.....	147
4.4.4	Compile a C++ program to solve $f(x)$	98	6.2.6	Cramer's Rule Revisited: Solve.....	148
4.4.5	Secant Method.....	100	6.3	User Defined Functions.....	149
4.4.6	Solve using Secant method: $f(x) =$	101	7	Seeing is Believing: Data Visualization.....	153
4.5	Review Questions.....	103	7.1	Basic 2D Plots.....	154
5	MATrix LABORatory.....	104	7.1.1	Free Fall Motion.....	158
5.1	MATLAB Interface.....	104	7.1.2	Write a MATLAB program to.....	159
5.2	Data Types in MATLAB.....	106	7.1.3	Radio-Active Decay	160
5.3	Scalars.....	106	7.1.4	Brownian Motion in MATLAB.....	161
5.3.1	Scalar Operations.....	106	7.1.5	Plot sine and cosine for $-2\pi \leq x \leq 2\pi$	162
5.3.2	MATLAB Variabls	107	7.1.6	Plot $e^{-2x} \sin(10x + 5)$ for $0 \leq x \leq 5$	164
5.3.3	Comment (%) in MATLAB.....	107	7.1.7	Write a MATLAB program to show... ..	165
5.3.4	disp() Command	108	7.1.8	Step Function.....	166
5.3.5	fprintf().....	108	7.2	Basic 3D Plots	167
5.3.6	input() Command.....	108	7.2.1	A MATLAB program for helix.....	168
5.3.7	format Command.....	109	7.2.2	ezplot3.....	169
5.3.8	Built-in functions for Scalars.....	109	7.2.3	Mesh Plots.....	169

7.2.4	Surf Plots	170
7.3	Exploring More Plot Types in MATLAB.....	171
7.4	Review Question	171
8	Exploring the Physical World through MATLAB	173
8.1	Importance of Simulations in Physics.....	173
8.2	Simulating Motion of Objects.....	174
8.2.1	Projectile Motion: Show that angles... ..	174
8.2.2	Range and Height of Projectile:.....	176
8.2.3	Gravitational Force—An Inverse.....	177
8.2.4	Plot Orbit of a Planet around the Sun	178
8.2.5	Write a MATLAB program to simulate.....	180
8.3	Electricity and Magnetism.....	181
8.3.1	Coulomb Force between Charges.....	181
8.3.2	Electric Field due to a Point Charge.....	182
8.3.3	Electric Field due to a Dipole.....	183
8.3.4	Electric Potential due to a Point	184
8.4	Quantum Mechanics	185
8.4.1	Plot the probability density function... ..	185
8.4.2	Probability density function of.....	186
8.5	Simple Harmonic Oscillator: Show in.....	187
8.6	Euler Method	188
8.6.1	Euler Equations.....	188
8.6.2	Freely Falling Object.....	189
8.6.3	Freely Falling Object in Viscous.....	191
8.6.4	Growth and Decay in RC Circuit.....	193
8.6.5	Growth and Decay in RL Circuit.....	195
8.6.6	Charge and Current in LC Circuit.....	197
8.6.7	Motion of Charge Particle in an.....	198
8.7	Calculus	202
8.7.1	Integration.....	202
8.7.2	Differentiation.....	203
8.7.3	Limtis.....	204
8.8	Numerical Analysis.....	205
8.8.1	Numerical Integration.....	205
8.8.2	Numerical Differentiation.....	207
8.8.3	Output:.....	207
8.8.4	Ordinary Differential Equations.....	208

Books by Quanta Publisher for BS Physics Students

<p>MECHANICS For BS Physics Students 2nd Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems, Subsid Examples, and Multiple Choice Questions (MCQs)</p> <p>0313-7899577</p> <p>Dr. F. Arif Khattak Dr. Syed Hamid Bukhari Dr. Syed Ahmad Bukhari Dr. Umar Nisar</p>	<p>WAVES AND OSCILLATIONS For BS Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Dr. Muhammad Tufiq Usmani Dr. Syed Hamid Bukhari</p>	<p>HEAT AND THERMODYNAMICS For BS Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Dr. Arshad Manzoor Raza Dr. Syed Hamid Bukhari</p>	<p>MODERN PHYSICS & ELECTRONICS For BS Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Dr. Syed Hamid Bukhari Dr. Syed Ahmad Bukhari Dr. Muhammad Abbas Khan</p>	<p>ELECTRICITY & MAGNETISM For BS Physics Programme 2nd Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Dr. Muhammad Tufiq Usmani Dr. Syed Hamid Bukhari</p>
<p>ATOMIC AND MOLECULAR PHYSICS For BS Physics Students 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems, Subsid Examples, and Multiple Choice Questions (MCQs)</p> <p>0313-7899577</p> <p>Dr. Syed Hamid Bukhari Dr. Syed Ahmad Bukhari Dr. Umar Nisar</p>	<p>CLASSICAL MECHANICS For BS/M.Sc. Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems, Subsid Examples, and Multiple Choice Questions (MCQs)</p> <p>0313-7899577</p> <p>Dr. Arshad Manzoor Raza Dr. Syed Hamid Bukhari</p>	<p>THERMAL & STATISTICAL PHYSICS For BS Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems, Subsid Examples, and Multiple Choice Questions (MCQs)</p> <p>0313-7899577</p> <p>Dr. Arshad Manzoor Raza Dr. Syed Hamid Bukhari</p>	<p>NUCLEAR PHYSICS For BS/M.Sc. Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Arshad Manzoor Raza Dr. Syed Hamid Bukhari Zohab Akram Khan</p>	<p>OPTICS For BS/M.Sc. Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Muhammad Abbas Khan Dr. Syed Hamid Bukhari</p>
<p>QUANTUM MECHANICS For BS Physics Programme 1st Edition</p> <p>Book Includes: Short Questions, Problems, Examples, MCQs</p> <p>0313-7899577</p> <p>Dr. K. M. Arif Khattak Dr. Syed Hamid Bukhari Dr. Syed Ahmad Bukhari Dr. Umar Nisar</p>	<p>METHODS OF MATHEMATICAL PHYSICS For BS Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems, Subsid Examples, and Multiple Choice Questions (MCQs)</p> <p>0313-7899577</p> <p>Dr. Arshad Shikoor Dr. Syed Hamid Bukhari</p>	<p>COMPUTATIONAL PHYSICS For BS/M.Sc. Physics Programme 1st Edition</p> <p>Solutions of Physics Problems with Matlab & C++</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Arshad Manzoor Raza Dr. Syed Hamid Bukhari</p>	<p>ELECTROMAGNETIC THEORY-I & ELECTRODYNAMICS-I For BS/M.Sc. Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Jamshaid Alam Khan Dr. Syed Hamid Bukhari</p>	<p>ELECTROMAGNETIC THEORY-II & ELECTRODYNAMICS-II For BS/M.Sc. Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Jamshaid Alam Khan Dr. Syed Hamid Bukhari</p>
<p>SOLID STATE PHYSICS-I For BS/M.Sc. Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Dr. Hafiza Sadiq Dr. M. Ehsan Murtaza Dr. Syed Hamid Bukhari</p>	<p>LASER For BS/M.Sc. Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Zohab Akram Khan Muhammad Abbas Khan Dr. Syed Hamid Bukhari</p>	<p>PLASMA PHYSICS For BS/M.Sc. Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Shafiq Ahmad Dr. Syed Hamid Bukhari</p>	<p>APPLIED PHYSICS For BS Physics Students 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Dr. Syed Hamid Bukhari Muhammad Abbas Khan Dr. Syed Ahmad Bukhari</p>	<p>DIGITAL ELECTRONICS For BS/M.Sc. Physics Programme 1st Edition</p> <p>Book Includes: Short Questions with Answers, Subsid Problems and MCQs are available at our website www.quanta-publisher.com</p> <p>0313-7899577</p> <p>Dr. M. Nouman Usmani Hafiza Umar Farooq Dr. Syed Hamid Bukhari</p>
<p>PHYSICS (MECHANICS) For BS Physics/Math/Chemistry Students</p> <p>Dr. Muhammad Anjad Farooq Dr. Syed Hamid Bukhari</p>	<p>PHYSICS (ELECTRICITY & MAGNETISM) For BS Physics/Math/Chemistry Students</p> <p>Dr. Muhammad Anjad Farooq Dr. Syed Hamid Bukhari</p>	<p>MODERN PHYSICS For BS Physics/Math/Chemistry Students 2nd Edition</p> <p>Dr. M. Anjad Farooq Dr. Syed Hamid Bukhari Muhammad Abbas Khan</p>	<p>PHYSICS SPECTROSCOPY & MODERN PHYSICS For BS Students of All Pakistan Universities / College</p> <p>Dr. Abdul Shikoor Dr. Syed Hamid Bukhari</p>	<p>ANALOG ELECTRONICS For BS/M.Sc. Physics Students 1st Edition</p> <p>Muhammad Salman Dr. Syed Hamid Bukhari</p>
